## **HOME USE RULES.**

### **All Books subject to Recall.**

Books not used for instruction or research are returnable within 4 weeks.

Volumes of periodicals and of pamphlets are held in the library as much as possible. For special purposes they are given out for a limited time.

Borrowers should not use their library privileges for the benefit of other persons.

Books not needed during recess periods should be returned to the library, or arrangements made for their return during borrower's absence, if wanted.

Books needed by more than one person are held on the reserve list.

Books of special value and gift books, when the giver wishes it, are not allowed to circulate.

Readers are asked to report all cases of books marked or mutilated.

# TABLE OF CONTENTS.

## INTRODUCTION.

Preface.....	i
Explanatory Statement by Executive Council of Iowa.	
Introduction.....	iii-cxxxi
Acquisition of Iowa Land from the Indians.....	iii-viii
Neutral Strip and Cession of 1830—Black Hawk Purchase—Keokuk Reserve—Cession of 1842—Cession of 1851.	
Disposition of Iowa Land for Public Purposes.....	ix-xvi
Public School Lands—University Lands—Agricultural College Lands—Swamp Lands—Railroad Lands.	
Growth and Spread of Population in Iowa.....	xvii-xxv
Julien Dubuque—Basil Girard—Flint Hills, Burlington—General Settlement, 1840-1860—Period of Development, 1860-1905—Maps showing Density of Population—Period of Temporary Decline of Population.	
Population of State by Counties, 1847-1905—a table.....	xxvi-xxix
Per cent of Increase or Decrease of Population, by Counties, 1838-1905—a table.....	xxx-xxxii
Population of State Classified According to Sex, General Nativity and Color—a table.....	xxxiii-xxxv
General Nativity of Population, with tables.....	xxxvi-xxxviii
General Nativity and Sex, with Age Classification.....	xxxix-xli
Persons of School, Militia and Voting Ages by General Nativity and Color, a table.....	xlii-xlviii
School Age with Reference to Nativity and Color—Males of Militia Ages—Males of Voting Ages.	
Native Born Population, with explanatory tables.....	xlix-li
Residence in Iowa—State of Birth—Age Classes.	
Foreign Born Population, with explanatory tables.....	lii-lix
Country of Birth, with Age Classes—Years in Iowa, with Age Classes—Naturalization, Years in United States.	
Conjugal Condition; Age and Sex Classes.....	lx-lxiii
Urban Population, with explanatory tables.....	lxiv-lxix
School Population and Attendance, Literacy, with tables.....	lxx-lxxii
Military Service of Civil War Veterans with reference to State of Enlistment, Class of Service, with Age Classification.....	lxxiii-lxxiv

## TABLE OF CONTENTS.

Gainful Occupation of Persons Ten Years of Age or over.....	lxxv-lxxxiii
<div style="padding-left: 40px;"> Agricultural Pursuits—Professional Service—Domestic and Personal Service—Trade and Transportation—Manufacturing and Mechanical Pursuits—Age Classes—Period of Employment—Specific Occupations. </div>	
Agriculture; Farms, Tenure, Grains, Stock and Fruits, with explanatory tables.....	lxxxiv-lxxxvi
Manufactures.....	lxxxvii-cxix
<div style="padding-left: 40px;"> Mineral Production and Distribution—Coal, value of product for a series of years—Stone, statement of product—Clay, with map—Gypsum—Lead and Zinc—Iron. </div>	
Banking, Historical Sketch, with tables showing growth.....	xcix-cliii
Fire Insurance, Statement of Growth and Business, with charts....	ciii-cviii
Life Insurance, Statement of Business, with chart.....	cviii-cix
County Tax Receipts and Disbursements, Statements and Discussion	cix-cxiv
Cities and Towns.....	cxiv
Institutional Expenditures, with Tabular Statements for series of years.....	cxiv-cxvi
Income of Educational Institutions with Statements from Organization.....	cxvi-cxxi
<div style="padding-left: 40px;"> State University, 1858-1905—Agricultural College, 1858-1905—State Normal School, 1876-1905. </div>	
Homes, Value and Incumbrance.....	cxxi-cxxii
Railroad Growth and Development, 1855-1905.....	cxxiii-cxxvi
Church Membership and Property, with Summary tables.....	cxxvi-cxxxi

# POPULATION STATISTICS.

## GENERAL TABLES.

TABLE No. 1.

General Nativity by townships, according to sex and age classes, with county totals.	
Nativities; (1) Native born of native parents; (2) Native born of foreign parents; (3) Foreign born.	
Age classes; (1) Under 5 years, (2) 5 and under 10 years, (3) 10 and under 18 years, (4) 18 and under 21 years, (5) 21 and under 45 years and (6) Over; 45 years.	
	1-383

TABLE No. 2.

Persons of school, militia and voting ages, by townships, according to general nativity and color, with county totals.	383-469
--	---------

TABLE No. 3.

Persons native born of native parents, by counties, according to age classes and sex, with state totals.	470-478
--	---------

TABLE No. 4.

Persons native born of foreign parents, by counties, according to age classes and sex, with state totals.	474-477
---	---------

TABLE No. 5.

Persons foreign born, by counties, according to age classes and sex, with state totals.	478-481
---	---------

TABLE No. 6.

Colored population, by counties, according to age classes and sex, with state totals.	482-485
---	---------

TABLE No. 7.

Total population, by counties, according to age classes and sex, with state totals.	486-489
---	---------

TABLE No. 8.

Population at various enumerations, by counties, according to sex, with state totals.	490-495
---	---------

TABLE No. 9.

Population at various enumerations, by counties, according to color, with state totals.	496-501
---	---------

TABLE No. 10.

Persons native born, by counties, state of birth and sex, with state totals.	502-510
--	---------

TABLE No. 11.

Foreign born males, by counties, according to country of birth, with state totals.	511-513
--	---------

TABLE No. 12.

Foreign born females, by counties, according to country of birth, with state totals.	514-516
--	---------

TABLE No. 13.

Total foreign born persons, by counties, according to country of birth, with state totals.	517-520
--	---------

# TABLE No. 14.

Foreign born persons, by counties, according to years in the United States, age classes and sex. ....	521-545
---	---------

# TABLE No. 15.

Foreign born males 21 years of age or over, naturalized and unnaturalized, according to years of residence in the United States, with state totals. ....	546-557
--	---------

# TABLE No. 16.

Conjugal condition, by age classes and sex, by counties.....	558-582
--	---------

# TABLE No. 17.

Persons, male and female, of given school ages, attending school a given portion of the year. ....	583-590
--	---------

# TABLE No. 18.

Literacy of persons of school age or over, by age classes and sex, with county and state totals.....	591-602
--	---------

# TABLE No. 19.

Total persons 10 years of age or over, engaged in gainful occupations and in each class of occupations, classified by sex, and by counties, with state totals. ....	603-605
---	---------

# TABLE No. 20.

Specific employments in manufacturing and mechanical pursuits, according to time employed during the year 1904, by age classes, with totals for state.....	606-609
--	---------

# TABLE No. 21.

Specific employments in trade and transportation, according to time employed during the year 1904, by age classes, with state totals.....	610-611
---	---------

# TABLE No. 22.

Civil War Veterans living in Iowa, by state of enlistment and class of service, with state totals.....	612-629
--	---------

# TABLE No. 23.

Age classification of Civil War Veterans living in Iowa, by counties, with state totals.....	630-652
--	---------

# TABLE No. 24.

Civil War Veterans of Iowa regiments and the navy now living in Iowa, by counties, with state totals.....	654-661
---	---------

# TABLE No. 25.

Ownership of homes of Civil War Veterans living in Iowa, by counties, with state totals.....	662-665
--	---------

# TABLE No. 26.

List of incorporated towns in Iowa, with population as shown by census of 1885, 1890, 1900 and 1905.....	666-679
--	---------

# TABLE No. 27.

Population of cities and towns of 1,000 or more inhabitants, in 1905, at enumeration periods from 1875 to date, number of increase or decrease and per cent of same	680-685
---	---------

# TABLE No. 28.

Inhabitants of towns of 1,000 or over, 1905, classified according to sex, general nativity and color.....	686-691
---	---------

## STATISTICS OF MANUFACTURES.

### TABLE No. 29.

Manufactures, by specified industries, 1905, number of establishments, capital employed, wages, cost of materials, etc., with state totals.....	692-695
---	---------

### TABLE No. 30.

Wage earners and wages, by specified industries, for men, women and children ..	696-699
---	---------

**TABLE No. 81.**

<b>Manufacturing, comparative summary, 1905 and 1900, for principal manufacturing cities of the state .....</b>	<b>700-701</b>
---	----------------

**TABLE No. 82.**

<b>Manufacturing, comparative summary for cities having a population of 8,000 to 20,000, 1905 and 1900.....</b>	<b>702-708</b>
---	----------------

**TABLE No. 83.**

<b>Manufacturing, comparative summary of ten selected industries, 1905 and 1900....</b>	<b>704-705</b>
---	----------------

**TABLE No. 84.**

<b>Manufacturing, percentage summary for selected towns.....</b>	<b>706-710</b>
--	----------------

**TABLE No. 85.**

<b>Manufacturing, percentage summary for selected industries.....</b>	<b>711-718</b>
---	----------------

## **STATISTICS OF AGRICULTURE.**

**TABLE No. 86.**

<b>Number of acres, improved and unimproved land, at enumeration periods, by counties, 1875 to 1905, with state totals.....</b>	<b>714-716</b>
---	----------------

**TABLE No. 87.**

<b>Number of farms owned, managed, rented for cash, share, or cash and share rent, by native and foreign born white, by counties, with state totals.....</b>	<b>717-720</b>
--	----------------

**TABLE No. 88.**

<b>Number of farms, acres owned, value of land, buildings and farm implements owned or occupied by owners or renters, with county and state totals.....</b>	<b>721-726</b>
---	----------------

**TABLE No. 39.**

<b>Acres, bushels and value of corn, wheat, oats, barley, rye and buckwheat, by counties, with state totals.....</b>	<b>727-732</b>
--	----------------

**TABLE No. 40.**

<b>Acres, tons and value of clover, timothy, millet and Hungarian, alfalfa, wild hay and other forage crops, and value of other farm crops, by counties, with state totals.....</b>	<b>733-736</b>
---	----------------

**TABLE No. 41.**

<b>Acres, quantity and value of grass seeds, potatoes and sweet corn, by counties, with state totals.....</b>	<b>737-740</b>
---	----------------

**TABLE No. 42.**

<b>Value of apples, peaches, plums, cherries and other fruits, by counties, with state totals.....</b>	<b>741-744</b>
--	----------------

**TABLE No. 43.**

<b>Number and value of cattle of given ages, by counties, with state totals.....</b>	<b>745-750</b>
--	----------------

**TABLE No. 44.**

<b>Number and value of horses, mules, asses, swine and other farm animals, by counties, with state totals.....</b>	<b>751-754</b>
--	----------------

**TABLE No. 45.**

<b>Number and value of sheep and goats, and quantity and value of wool, by counties, with state totals.....</b>	<b>755-758</b>
---	----------------

**TABLE No. 46.**

<b>Number and value of cattle of specified breeds, entitled to registry, by counties, with state totals.....</b>	<b>759-762</b>
--	----------------

**TABLE No. 47.**

<b>Number and value of horses and sheep of specified breeds, entitled to registry, by counties, with state totals.....</b>	<b>763-766</b>
--	----------------

**TABLE No. 48.**

<b>Number and value of swine of specified breeds, entitled to registry, by counties, with state totals.....</b>	<b>767-770</b>
---	----------------

# TABLE NO. 49.

Number and value of chickens and other fowls, quantity and value of eggs, and value of dairy products and vegetables, by counties, with state totals..... 771-773

## FINANCIAL STATISTICS.

### TABLE No. 50.

Assets and liabilities of private banks, (1887-1904) reporting to the Comptroller of the Currency; very far from being complete ..... 774-775

### TABLE No. 51.

Assets and liabilities of savings banks, 1878-1905..... 776-777

### TABLE No. 52.

Assets and liabilities of state banks, 1873-1905 ..... 778-779

### TABLE No. 53.

Statements of the National banks of Iowa reporting to the Comptroller of the Currency..... 780-781

### TABLE No. 54.

Statement of amount of fire insurance risks written or renewed, for years 1868 to 1904. .... 782-783

### TABLE No. 55.

Statement of amount of premiums received by insurance companies other than life, for years 1870 to 1904..... 784

### TABLE No. 56.

Statement of amount of losses paid by insurance companies other than life, for years 1870 to 1904..... 785

### TABLE No. 57.

Statement of the business of life insurance companies operating in Iowa, for the years 1868 to 1904..... 786-787

### TABLE No. 58.

An itemized statement of county receipts, from all sources, for year ending December 31, 1904, by counties, with state totals..... 788-791

### TABLE No. 59.

Total expenditure by counties for all purposes, classified according to certain funds, for year ending December 31, 1904, with state totals..... 792-793

### TABLE No. 60.

Statement of the expenditures of the counties of the state for purely county purposes, for the year ending December 31, 1904, with state totals..... 794-797

### TABLE No. 61.

Compilation of data relating to water works, electric light and fire protection, in cities of 1000 inhabitants or over, 1905..... 798-821

### TABLE No. 62.

Statement of the data relating to parks, libraries and indebtedness of cities and towns..... 822-833

### TABLE No. 63.

Statement of amount and kind of paving in the cities and towns of the state, 1905. 834-835

### TABLE No. 64.

Statement of the disbursements on account of the penitentiary at Anamosa, by biennial periods, 1878-1905..... 836

### TABLE No. 65.

Statement of the disbursements on account of the penitentiary at Ft. Madison, by biennial periods, 1857-1905 . .... 836

TABLE No. 66.

Statement of the disbursements on account of the Boys' Industrial School at Eldora, by biennial periods, 1867-1905 .....	886
--	-----

TABLE No. 67.

Statement of the disbursements on account of the Girls' Industrial School at Mitchellville, by biennial periods, 1889-1905 .....	887
--	-----

TABLE No. 68.

Statement of the disbursements on account of the Hospital for Insane at Cherokee, by biennial periods, 1901-1905 .....	887
--	-----

TABLE No. 69.

Statement of the disbursements on account of the Hospital for Insane at Clarinda, by biennial periods, 1889-1905 .....	887
--	-----

Statement of gross earnings per mile of Iowa railroads, for the years ending January 1, 1872 to 1885, inclusive .....	858-868
---	---------

TABLE No. 80.

Statement of assessed value per mile of Iowa railroads, for years 1872 to 1905 .....	864-869
--	---------

TABLE No. 81.

Church statistics; number of congregations, character, value and seating capacity of places of worship, number of members and Sunday school scholars, number and value of parsonages of the several denominations, by counties ..	870-893
---	---------

## PREFACE.

---

In accordance with the provisions of Chapter 8, Laws of the 30th General Assembly, the Executive Council has prepared the forms suitable for taking a census, and compiled the returns made by the county auditors to the Secretary of State. In addition to such compilation, it has added such other statistics relating to matters of public interest as it has been able to procure from the heads of departments and other sources.

The tables which cover the returns as to population and agriculture will be found to embrace many interesting and important facts not hitherto embodied in any state census report. The introduction, which includes the statistics not gathered by the assessor and many comparative tables, is intended not only to show the present condition of the state, but its growth and development. This feature of the present report has never before been attempted in this state, and while it is limited in its scope on account of the appropriation at the disposal of the Council, it is believed that the people will find it very instructive and useful.

The introduction, with its history and comparative tables, was prepared by Prof. W. R. Patterson, who has done his work with signal ability. The returns of the county auditors and their compilation have been under the direction of A. H. Davison, Secretary of the Council. It is due to him to say that his duties have been performed with extraordinary economy and unusual accuracy.

The Council believes it to be its duty to make a statement with respect to the population of the city of Atlantic. The original return made by the assessor showed a population of 5,180. Certain residents of the city brought an action in the District Court of Iowa, for Cass county, against the assessor and members of the Council, alleging that the return was fraudulent in that the assessor had intentionally included many names in the enumeration which ought not to have been included. The case was tried and the District Court decided that the assessor had wrongfully enumerated 292 persons, (of these five had not been reckoned in the 5,180,) leaving the population,

of the city, 4,893. The assessor appealed to the Supreme Court, where the suit is now pending. The Council has not appealed and will not appeal; and its members are of the opinion that the publication of the report should not be delayed until the Supreme Court decides the case. Therefore, the population of Atlantic is shown according to the return, as modified by the decree, viz, 4,893.

ALBERT B. CUMMINS,  
W. B. MARTIN,  
B. F. CARROLL,  
G. S. GILBERTSON,

*Executive Council.*

Dated at Des Moines, Iowa, this 2d. day of January, 1906.

## INTRODUCTION

### ACQUISITION OF IOWA LAND FROM THE INDIANS.

The reverence of the Indian for the "Father of Waters," and the natural boundary the Mississippi formed, served to check for a considerable period the flood of immigrants that followed the Ohio Valley, or reached the western prairies by way of Pittsburg. As early as 1804 the Sacs and Foxes ceded to the United States their land east of the Mississippi, but it was not until after the defeat of Black Hawk, in 1832, that the most desirable portion of Iowa, "the Beautiful Land," came into possession of the United States. In 1825 Governor Clarke, in council with some three thousand chiefs and warriors at Prairie du Chien, assured them that the "Great Father" wanted "not the smallest piece" of their land; that the only object of their meeting was to bring about peace between the hostile tribes. To this end, it was agreed that the Sioux should remain north and the Sacs and Foxes south of a given line dividing the state from east to west. This line began at the mouth of the upper Iowa river, ascending the river to its left fork which it followed to its source, thence in a direct line to the upper fork of the Des Moines river in Humboldt county, and thence direct to the lower fork of the Calumet river, now known as the Big Sioux, which branch, according to earlier surveys, was north of the Rock river.

This imaginary line, however, failed to restrain the hostile tendency of the warring tribes, and in 1830 several bands of the Sioux ceded a strip of land twenty miles in width from the Mississippi to the Des Moines river situated north and adjoining the line of the treaty of 1825. At the same time the confederated tribes of the Sacs and Foxes made a like cession south of the treaty line, the two acquisitions constituting the so-called "Neutral Strip."

In the same treaty the tribes of the Sacs and Foxes gave the United States that portion of the territory lying west of the watershed dividing the Missouri and Des Moines rivers, eastward to the "Neutral Strip," northward to the present state of Minnesota and westward to the Missouri river, with the exception of a portion of Lyon county which remained in possession of the Sioux.

This vast tract of land was granted with the understanding that it should be used for Indian purposes. The "Neutral Strip" might be hunted upon by either of the tribal parties to the treaty, and the United States was at liberty to settle upon any of the lands, acquired at this date, such other tribes as the President might see fit. In accordance with this agreement, the Winnebagos, after selling their land east of the Mississippi, were settled upon that portion of the "Neutral Strip" to the east of the Cedar river in its course through Butler and Floyd counties, and the Pottawattamies were given 5,000,000 acres in the southwestern part of the present state of Iowa.

The noted warrior, Black Hawk, had vigorously refused to recognize the treaty of 1804 and, although in 1816 he "touched the goose quill," as he expressed it, to the instrument affirming the treaty, his reluctance to give up the land in question led to the conflict of 1832. He was defeated and compelled to sell the land now known as the "Black Hawk Purchase." This gave to the United States a tract about fifty miles in width extending along the Mississippi river from the "Neutral Strip" to the Missouri line, with the exception of the Keokuk Reserve of four hundred square miles along the Iowa river in Louisa county. By this means the eastern portion of the state was secured with the exception of a small tract of land lying between the Des Moines and Mississippi rivers and south of a line drawn west from Ft. Madison, reserved under the treaty made in 1825 for the Half Breeds of the Sacs and Foxes of Missouri, and known as the "Half Breed Tract."

Immigration rapidly spread over the territory thus acquired, and in 1836 the Keokuk Reserve was given over to the United States. A year later, the need of more land being imperative, a tract of 1,250,000 acres lying immediately west of the Black Hawk Purchase was obtained, making what is known as the "Second Purchase."

The treaty of 1830 recognized the claim of the Yankton band of the Sioux to the land ceded at that time, and in 1837 the government purchased their interest, thereby securing undisputed title to the northern portion of the Neutral Strip. At the same time the Missouri Sacs and Foxes, as distinguished from the confederated tribes of Iowa, ceded their interest in the land south of the treaty line of 1825 and between the Mississippi and Missouri rivers. The Iowa bands, who had long been recognized as part owners of the same territory, gave over their interest in

1838, but it was not until 1842 that the confederated tribes of the Sacs and Foxes, wavering before the tide of immigration, ceded to the United States all other land east of the Missouri. They agreed to vacate at once that portion of the territory to the east of the line running due north and south from the Painted Rocks on the White Breast fork of the Des Moines river, and within three years from the ratification of the treaty to move west of the Missouri.

The remaining rights of the Indians to the state were procured when the Winnebagos, in 1846, ceded their interest in the Neutral Strip and the Sioux, in 1851, gave title to the northern portion of the present state.

### PURCHASE PRICE OF IOWA LANDS.

The exact amount paid the Indians for the lands of Iowa cannot be determined. The treaties state the purchase price in terms of money, annuities and merchandise, which latter item it is impossible to fix a value upon at the present time. Another element of uncertainty lies in the overlapping areas of some of the cessions and the extension of several tracts beyond the present confines of the state.

The Neutral Strip and Cession of 1830 was ceded to the United States by certain tribes of the Sioux and the confederated tribes of the Sac and Fox Indians for a sum total of \$284,132. The remaining tribes having rights in the territory gave them over in 1837. In the case of the Missouri Sacs and Foxes, however, the cession included not only the above-mentioned tract but all the land between the Mississippi and Missouri rivers, as far north as the treaty line of 1825. The exact extent of the territory claimed by this tribe cannot be determined, but it is probable not over one-fourth of the grant was in the Cession of 1830. The same area was included in the treaty with the Iowas in 1838, for which they received practically the same amount of money as the former tribe. Assuming this proportion to be correct, the total cost of the 20,000 square miles of land is \$370,007, or about three cents per acre.

The Black Hawk Purchase adjoining the Neutral Strip upon the south, although taken as a result of the Black Hawk War, was made of a strip of land about fifty miles in width, extending along the Mississippi to the southern border of the state and comprising some 7,500 square miles. For this, the government

agreed to pay the sum of \$655,000, besides giving annually, for thirty years, forty kegs of tobacco and forty pounds of salt.

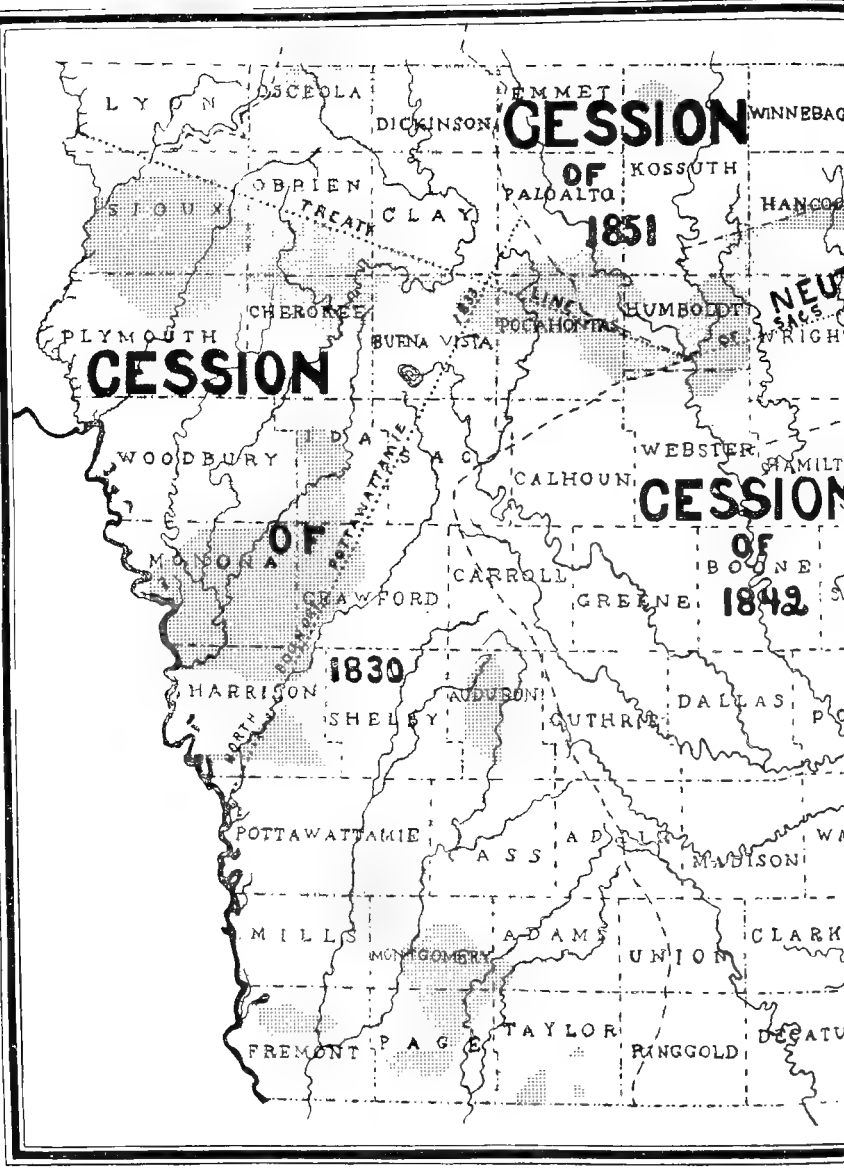

At the time of making the treaty the tribe was given, for the benefit more particularly of the women who had lost their husbands in the war, a present of thirty-five beef cattle, twelve bushels of salt, thirty barrels of pork, sixty barrels of flour and six thousand bushels of Indian corn. Without estimating the value of these latter products, the cost of the tract to the United States was about fourteen cents per acre.

The Keokuk Reserve was secured for \$198,599.87½, giving the United States four hundred square miles of the Iowa Valley at a little less than eight cents per acre. The land immediately west of this tract was more expensive. This purchase included 1,250,000 acres of land, and was secured for \$377,000, or a little over thirty cents per acre. Of this sum \$200,000 was to be held in trust, the government agreeing to pay at least 5 per cent interest per annum upon the same. The remainder not required for debts or presents was to be expended to procure laborers to help in agricultural pursuits, break up and fence the land still in their possession to the westward, erect two grist mills and purchase a large amount of goods desired by the Indians.

What appears upon the map as the Cession of 1842 was secured by the treaty with the Iowas in 1838, and from the Missouri Sacs and Foxes in 1837, under the conditions previously mentioned. The confederated Sacs and Foxes, however, had the greatest interest in this land, and in 1842 sold the same to the United States for \$1,058,566.00, which sum, added to the amounts previously mentioned, made the total cost of the tract \$1,137,941.00, or ten cents per acre. Of this sum, \$878.725 was held in trust by the United States, upon which the usual charge of 5 per cent interest was to be paid.

The remaining strip of land now within the boundaries of the state was along the northern border and legally the property of the Sioux Indians, although at this period they had moved to the northward and occupied what is now southern Minnesota. By 1851 they were convinced of their inability to hold the lands against the advancing whites, and sold what is now a large portion of the state of Minnesota, together with their remaining land in Iowa, for a sum total of \$1,390,000. The greater portion of this was to be held in trust under the usual conditions. It appears that about one-tenth of this cession was in the state of Iowa, and therefore the sum of \$139,000 may be said to have been paid for this northernmost tract.

**MAP**  
SHOWING  
**ACCESSION**  
OF  
**TERRITORY**  
FROM  
**INDIANS**

Accepting this estimate, the state of Iowa would have cost the United States government the sum total of \$2,877,547.87, a little over eight cents per acre.

## DISPOSITION OF IOWA LAND FOR PUBLIC PURPOSES.

The public lands of Iowa have been given for two purposes: to provide funds for an educational system, and to aid in the construction of railways. That this has been the case is due to the state authorities, who secured a modification of the act of congress of 1841, which gave each new state 500,000 acres of land to aid in internal improvement. By their efforts, a clause was wisely placed in the original Constitution of 1844, providing that the proceeds of the sale of this land, together with all other land that might be granted by congress for the benefit of schools, "shall be and remain a perpetual fund," for the support of the schools of the state. Congress approved this provision when the state was admitted into the union. In accordance therewith, this grant, together with the Sixteenth Section grant approved by congress March 3, 1845 and the Five Per cent fund arising from the sale of the public lands of the state, forms the basis of the permanent school fund.

In selecting the 500,000 acres granted it by the original act, the state exceeded the amount, as will be seen by table No. II, and returned \$536,022.59 instead of the amount contemplated in the act. Various plans for refund were suggested and even attempted. The legislature even empowered the Governor to make settlement of all claims. It does not appear, however, that the Governor acted upon his authority, and partial restitution was made by the government withholding a part of the Five Per cent fund due the state from the sale of public lands.

In the controversy over the Des Moines river valley land this again came up and it was decided that, in lieu of the land granted the Des Moines valley railroad by the government, the state of Iowa should reimburse that corporation at the rate of \$1.25 per acre for the excess amount of land selected under the 500,000 acre grant, and remaining unsettled at that date, which was something like 12,000 acres. By this method a settlement very advantageous to the state was made, as much of the land selected had been sold for more than the refund price, and although the school fund received the number of acres designated in the original grant, the fund itself exceeds the amount that grant would have produced.

The Sixteenth Section grant was made in 1845 and gave to the state the Sixteenth Section of every congressional township for the benefit of the public schools. Where these sections had been previously sold or disposed of, other land in like amount was to be given. The sale of this land was placed under the school fund commissioners of the several counties. First, under the supervision of the superintendent of public instruction, where it remained until 1858, when the responsibility was assumed by the county judge in connection with the county trustees. In 1861 the plan was again changed, and the board of supervisors, the township trustees and the clerk of the district court were made the guardians. When, however, the office of county auditor was created, in 1868, the duties of the clerk in relation to this land were assumed by him. Under these various authorities, 1,013,823.77 acres were selected and to date 1,007,072.99 have been patented, leaving unpatented the sum of 14,738.53 acres. These figures are made up from the amount patented each year, from which it appears that there has been an error or duplication in the published reports to the amount of 7,987.75 acres.

The remaining lands held by the public schools are the mortgage school lands obtained from foreclosure made upon the security for loans of the permanent school funds. In as much as this was not an original grant, the amount thereof is not given in the table. The total amount, therefore, received by the public schools of the state and patented to date is 1,539,214.73 acres, there remaining unpatented, but not unoccupied at this date, 22,802.25 acres.

In addition to the amount of land received for public school purposes, the act of July 20, 1840 provided that two entire townships, or seventy-two sections of land, should be set aside for the use of a "University in the territory of Iowa." The board of trustees of the institution was to have the management and sale of this land, and the university was to receive the entire benefit derived therefrom. In 1845 the grant was renewed and, in accordance with the provisions of the act, 45,428.96 acres were selected, of which amount there remains to be patented 834.67 acres.

The remainder of the land given to the university is known as the Saline land grant. This grant was made over to the state in 1845, giving it the use of the Salt Springs within its boundaries, not to exceed twelve in number, together with six selections of

land contiguous to each of the springs. In 1852 the lands were granted to the state in fee simple. Prior to this, however, the legislature had approved an act providing that the funds arising from the sale of this land should be used for founding and supporting a lunatic asylum. Considerable difficulty seems to have been experienced as to the disposition of this land, and several acts were passed relative thereto, but in April, 1860, it was turned over to the state university, and in 1864 the trustees of that institution assumed full control of the sale of these lands. Under this grant 46,218.45 acres have been selected, of which there remains unpatented 1,800.00 acres.

The total amount received by the State University from these two grants was 92,147.41 acres, of which there remains unpatented 2,644.66 acres.

Two congressional grants and a purchase with the funds accumulated from the lease of the land granted enabled the State Agricultural College to select 224,084.05 acres, the entire amount of which has been patented with the exception of 565.50 acres. The earliest grant received by the college was known as the Five Section grant and was located in Jasper county. This was set aside in 1845 for the erection of public buildings, but in 1858 the General Assembly by joint resolution asked consent of congress to divert the grant to the Agricultural College and in 1862 congress accepted the recommendation, and the lands were turned over to the college. In the same year, the general act was passed for the establishment of colleges for the benefit of agricultural and mechanic arts, which gave each state 30,000 acres for each senator and representative to which the state was entitled. Under this grant, Iowa was authorized to select 240,000 acres. When the actual selection was made, however, it was found that a considerable portion of the land selected was of double minimum railway land, thus reducing the absolute number of acres received to 204,309.30 acres instead of the original amount. The remaining land accruing to this college is known as the "Cusey Purchase," the name being derived from the fact that the lands were selected and purchased by Mr. Cusey. The amount so obtained was 15,013.18 acres.

So much confusion has resulted from the selection of swamp land under the grant of 1850 that any statement as to the amount patented is subject to controversy. The figures in the table are taken from the report of the commissioner of the land

office of the United States and show the amount actually patented to the state. From this it appears that the state has received 1,192,044.32 acres out of a total of 4,571,735.94 selected. The conflict has arisen out of the difficulty of determining the exact limits of the swamp or overflowed lands unfit for cultivation and the various interpretations of the original act on the part of the federal authorities.

Immediately upon the passage of the act large tracts were selected and, after varying decisions, the land commissioner decided to accept the original survey in determination of these tracts. This was protested by the state on the ground that the original surveys were incomplete, but the commissioner refused to enter tain the protest.

Another source of trouble was the selection of swamp land within the areas granted, to aid in the construction of railways. It was to the interest of the railways to have the land certified under their grants, and to the state, in like manner, to have it returned as swamp land. In the controversy the state, spurred on by the fact that although the original act directed that the lands so obtained should be used for the construction of levees and drains for the reclamation of the land, authorized, by act of the General Assembly in 1885, the use of these funds for the erection of public buildings by the counties, and directed the drainage commissioner to pay over the funds in his hands to the county treasurer.

A similar act in 1857 made it possible for these funds to be loaned out at interest, and in 1858 a further extension of the possible uses of the money was made by giving the county the right to construct buildings for educational purposes, build roads and bridges, and aid the railroads with funds so obtained, provided the use was sanctioned by the majority vote of the people. In 1862 the act of 1856 was further amended, whereby the funds could be devoted to the permanent school fund, and in 1878 the board of supervisors was authorized to make such disposition of the money as should be for the best interests of the county. With local interests, therefore, continually using every endeavor to obtain further funds from these sources, confusion was an only result. The federal authorities found themselves unable to treat with the separate claimants and were forced to make general rulings, which it is said deprived the state of large tracts that would otherwise have ac-

crued to it. Aside from the total amount patented, however, a cash indemnity of 581,091.86 acres was allowed, making an actual total of 1,773,136.18 acres.

Grants of lands to railways were made by the acts of May 15, 1856 and June 2, 1864. The act of 1856 granted alternate sections for six miles in width on either side of the track with permits to select, in place of lands already disposed of, land within sixteen miles upon either side of the road. It further specified that the roads subject to this grant were to run from Burlington to a point on the Missouri river near the mouth of the Platte, from Davenport by way of Iowa City and Fort Des Moines to Council Bluffs, from Lyons City northwesterly to a point of intersection with the main line of the Iowa Central Air line railroad, which was near Maquoketa, and thence as nearly as practicable to the 42d Parallel, across the state to the Missouri river and from the city of Dubuque to a point on the Missouri river near Sioux City.

The act of 1864 supplemented the one of 1856 and granted alternate sections for ten miles on either side of the track with the proviso that for lands already settled selections could be made within twenty miles upon either side of the road. The roads subject to the grant were lines running from Sioux City to the Minnesota state line between the Big Sioux and the west fork of the Des Moines river, and the McGregor western railway company from McGregor westward on or near the 43d Parallel until it intersected the line running from Sioux City northward.

Under these two acts, the greater portion of the land given to aid in railroad construction was secured. It will be noted, however, that the amount of land patented by the railroads from year to year is not given in Table No. II. This arises from the confusion that obtains, due to conflicting grants. The various decisions relative to the grant of land for the improvement of the Des Moines river is the principal factor that hinders a statement of the amount patented, but the conflict over the swamp lands already referred to was an element. In 1846 the original grant of alternate sections for a distance of five miles on either side of the Des Moines river from its mouth to the Raccoon fork, "to improve navigation," was made. The secretary of the treasury, however, permitted the selection of land from the mouth of the Des Moines river to its source instead of to the Raccoon fork as designated in the act.

The question of the legality of these grants was soon raised and within a very short period of time decisions had been made and reversed repeatedly by several officers. In 1859 the supreme court was called upon to settle the dispute and decided that the grant extended only to the Raccoon fork. Throughout this period the work of improving the river, in accordance with the provision of the grant, continued. Land had been sold north of the Raccoon river and the proceeds applied to the work in hand. The Des Moines Navigation railway company had been granted the contract of improvement and, in lieu of the work done, had accepted 205,489.64 acres, to be located at a later date. Prior to this selection, difficulties arose between the state and the company, which were later adjusted by an act of the Assembly in 1858. The agreement was to the effect that the company should receive 212,741 acres above the Raccoon fork and 53,367 below it. To further complicate matters the General Assembly in 1858 donated all lands granted the state under the act of congress August 8th, 1846, known as the Des Moines river grant, and such other lands and compensation as might be given by congress in extension of such grant or in lieu of any portion thereof, to the Keokuk, Ft. Des Moines and Minnesota railway company, (Des Moines Valley railroad company,) except the lands already sold, or which should hereafter be deeded to the Des Moines Navigation railway company.

The decision of the supreme court limited this grant as mentioned above, but in 1862 congress extended the limits from the Raccoon fork to the Minnesota line and allowed indemnity land. Under these conditions, the amounts patented from year to year, as shown by the federal reports, are unreliable and are therefore not given.

A fairly accurate statement may, however, be made as to the total amount received and that given to each road. The former sum is 4,881,036.16 acres. The latter is shown in Table No. III, taken from the report of the state land department for the year 1901.

This makes a total donation of land to the state of 7,923,858.73 acres, of which almost one-half was given to the railroads.

## GROWTH AND SPREAD OF POPULATION IN IOWA.

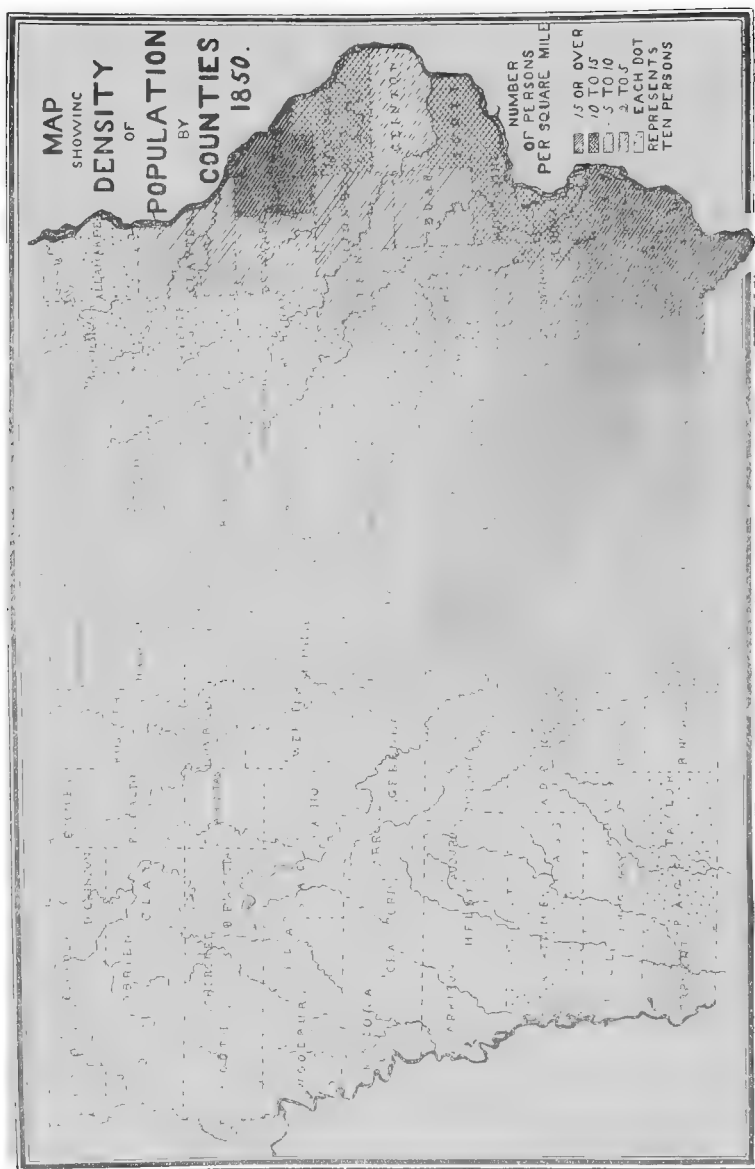

The discovery of lead east of the Mississippi in 1780 caused Julien Dubuque, then living at Prairie Du Chein, to visit the deposits and later seek a grant from the Indians. In 1788 he was successful in obtaining a tract of land supposed to embrace all of the lead deposits of that district, and with a few followers, later known as "Spanish Miners," settled upon the claim. The richness of the mines was soon a certainty and, in 1796, he sought to confirm his title with a patent from the Spanish government, and was successful in securing the desired papers. His death in 1810, however, cut short his labor, and the Indians laid claim to his grant on the ground that it was only given for the life-time of Dubuque. This claim was disputed by Auguste Choteau and his heirs, to whom Dubuque had transferred a portion of his holdings in 1804. The case was continued in the several courts until 1853 when the decision of the Supreme Court of the United States denied the validity of the claim of the heirs.

The second group of settlers upon what is now Iowa soil received their grant in 1795. The papers were made out in favor of Basil Giard and gave title to 5,860 acres in what is now known as Clayton county, but during the early history of the territory was called the Giard Tract. The remaining grant of this period was made to one Louis Hanori, a trader, who, by way of compensation, was to "watch the Indians and keep them in the fidelity they owe to His Majesty." The claim was located in what was later known as the Half Breed Tract. In the litigation that followed, this land was involved, but the title of the assigns was finally confirmed by the Supreme Court and became the oldest legalized title in the present state.

During this early period various other traders or trappers came upon Iowa soil and, in many instances, chose wives from among the Sac and Fox Indians with whom they traded. Their commerce with the Indians was of such a nature as to secure their friendship, and in 1824 the tribes made provision for them by reserving a triangular strip of land south of a line west from Fort Madison and bounded by the Des Moines and Mississippi rivers. It was therefore to the advantage of these men to settle upon this so-called Half Breed Tract. Later, when the country was opened for settlement, this section and Dubuque were points of entry for immigrants. From this time the trapper and trader is supplanted by the settler. These men and women came from the east, crossed the river at Fort Madison and the Flint Hills, now Burlington, or sought to secure rights to the lead mines of Dubuque. The United States government, however, refused to let them pass the river and sent troops to constantly patrol its banks, turn back the new arrivals and drive out the "squatter." This was the situation when the Black Hawk Purchase was made, and the frantic rush of settlers that marks the opening of new lands to-day was permitted to occur for the first time upon Iowa soil.

The conquest was brief. In 1833 a post-office was established at the New Lead Mines and a year later the town was named Dubuque; at the same date the Flint Hills became known as Burlington; Fort Madison was laid out in 1835 and Davenport in 1836. In 1840, as will be seen by the map showing the density of population at that date, the greatest number of persons per square mile is found in the south-eastern part of the state. Des Moines county is the most thickly populated, having 13.9 persons per square mile; Lee county follows in order of density

with 12.4; Van Buren, 12; Henry, 8.7; Jefferson, 6.4 and Dubuque and Louisa something over 5. The population had already begun to ascend the Cedar river and Linn county had 1,373 inhabitants. The other rivers were not so successful in luring the inhabitants westward, but by 1850, as will be seen by the map for that period, the Des Moines river was the pathway for the pioneer into Boone and Dallas counties, and already Mahaska, Polk and Marion are well populated.

During this period the population of Lee county had increased so rapidly that the density was then 38.5 per square mile. Des Moines county ranked second with 32.4, and Van Buren third with 24.4. In short, all of the Black Hawk Purchase and the Second Purchase had been taken up and already the population had reached the watershed between the Des Moines and Missouri rivers and was ready to join with the early settlements about Council Bluffs and in Franklin county to complete the conquest of the southern portion of the state.

The increase of 443 per 1000 inhabitants from 1838 to 1844 represents the hasty assembly of pioneers upon new soil that had long been heralded as of exceptional fertility. After the first rush there was a pause, yet the annual increase was not less than 137 per 1000 inhabitants and rose to 243 in 1850. From 1852 to 1856 the tide of immigration ran high and was only held in check by inadequate transportation facilities. A writer in 1854 states that "Immigrants to Iowa wait days to get a chance to be ferried across the river. They come in crowds a mile long, from every land, and the cry is 'still they come', the immigration to northern Iowa exceeds anything ever seen or heard of except the stampede to California."

By 1860, with the exception of the northwest corner of the state, every county was settled; the eastern portion had assumed the density of some of the older states of the Union and practically all of the counties west of the watershed had a density of about 5 per square mile. Lee ranked first with a density of 59.6; Dubuque had supplanted Des Moines in second place with a density of 51.5 as against 49 in Des Moines.

From this time the history of the state is that of its development rather than settlement. The great influx of settlers that came to it from 1850 to 1856, increasing its population from 192,214 to 517,875, an advance of 169.4 per cent, is not again witnessed. Together with the other states of the Union its progress was checked from 1860 to 1865, the increase being only 12.06

per cent. The return of peace partially restored the progress existing prior to the war and the federal census of 1870 gave the state a population of 1,194,020, an advance of 59.89 per cent in the five preceding years. The highest advance since this date is from 1875 to 1880, 20.29 per cent, an increase more than double that of any later period. The present population of the state, 2,210,050, represents a decrease of .9 per cent since 1900.

### DECLINE IN POPULATION.

The present decline in the population of the state is unexpected only when state totals are considered. If study of the counties at the several enumerations is made, as permitted by tables number VI and VII p. xxvi and following, it will be seen that the advance of the state as a whole has been due to the growth of the more recently settled portions. The newer sections have not only advanced the total state population, but also made up for the decrease in the older settled parts. As early as 1875 the state enumerations show that thirteen counties decreased in population, and nine increased less than five per cent. From 1875 to 1880 a decline occurred in five counties, and ten advanced less than five per cent. From 1880 to 1885 the number showing a loss was increased to thirty, and sixteen advanced less than five per cent. From 1885 to 1890 the figures were sixteen and thirty-four, respectively; 1890 to 1895 the number declining is reduced to eight, but forty-two advanced less than five per cent; 1895 to 1900 the number showing a loss is only two, and twenty-eight under the five per cent advance. The present census shows that seventy-seven counties have decreased and eleven advanced less than five per cent.

The counties decreasing or showing a small increase according to the census of 1875 were, with a few exceptions, all those east of a line running north and south from the western border of Worth county and those in the two southern tiers of counties. The only change in this disposition of the counties by 1890 was to add to the section by advancing the southern limit to include all counties south of a line running east and west along the southern border of Calhoun county. It should be noted, however, that more of the eastern and southern counties show at least a smaller increase than formerly. The same section, with the exception of Cherokee county, indicates a decline or slight increase in 1895, and this is also true in 1900 with the exception

of Clay and Plymouth, which show only a slight advance. In 1905 the counties with a slight gain are upon the northwest border of the state—Woodbury, Plymouth, Sioux, Osceola, Dickinson and Emmett—and the remainder are scattered through the state, but largely in the southeastern section. They are Monroe, Polk, Poweshiek, Appanoose, Des Moines, Cedar, Scott, Linn.

TABLE NO. V.

*Increase or Decrease, Urban or Rural, of population of the counties of the state, showing increase in population from 1900-1905, and increase of principal town in each county for same period.*

Woodbury.....	6,249	8,598	-2,339	Sioux City..... 7,841

Examining the twenty-two counties of the state in which an increase in population has occurred, as given in the above table, it will be seen that, with the exception of Dickinson and Monroe counties, the gain has been entirely due to the increase in the cities and towns. Not only have the incorporated places, which are given under the head of Urban population, advanced in numbers, but their increase has been sufficient to make up a very considerable loss in the rural districts. The number in Dickinson county is so small that it is perhaps unnecessary to suggest a reason for the situation, but in Monroe county the great concentration of the coal mining industry has given it a large number of unincorporated settlements that account for the apparent exception to the rule.

It is worthy of note that in the majority of these counties the increase in the population of the principal town or city of the county will equal or exceed the total increase of the county.

This is indicative of a movement toward the larger cities. The advance in Black Hawk county was 4,218, while its principal city, Waterloo, shows an advance of 5,491. In like manner, Carroll city shows an advance of 321, while the county of the same name increased but 193. The exceptions to the rule are: Appanoose county, in which the town of Centerville advanced but 711 while the county made an increase of 1,266; Dickinson, in which Spirit Lake advanced 22 in numbers and the county 135; Lyon increased 329, while Rock Rapids advanced but 13; Polk county increased almost 1,000 more than the city of Des Moines; the advance in Sioux county exceeded that of Hawarden by over 400.

## GENERAL NATIVITY.

## TABLE NO. IX.

*Number of the several nativities and the per cent they form of the total population for 1890, 1900 and 1905.*

Nativity.	Number.			Per cent.		
	1890	1900	1905	1890	1900	1905
Native White, Native Parents..	1,083,967	1,261,068	1,264,443	55.6	56.5	57.2
Native White, Foreign Parents.	513,187	651,817	648,532	26.9	29.2	29.3
Foreign Born.....	323,932	305,782	282,296	16.9	13.7	12.8
Colored.....	10,811	13,186	14,831	.6	.6	.7
Total.....	1,911,896	2,231,853	2,210,060	100.0	100.0	100.0

The population of the state is made up of 1,264,443 persons native white of native parents, 648,532 native white of foreign parents, 282,296 foreign born, and 14,831 colored. According to the per cents of the total population, these numbers would give 57.2 per cent of the population native white of native parents, 29.3 native white of foreign parents, 12.8 foreign born, and only .7 per cent colored. The colored, as here given, include only those of native birth. Those born in foreign lands, 52 in number, are given with the foreign born. The number in any one country, however, is so small that the per cents are not affected by their presence or absence. The 346 Indians in Tama county are included with the colored.

The native white of native parents have gradually increased in both numbers and proportion of the population. In 1890 the number in this class was 1,063,967 and by 1905 had increased to 1,264,630 persons; or, whereas they constituted 55.6 per cent of the total population in 1890, they now form 57.2 per cent. The native white of foreign parents have experienced a very slight decline in the past five years; before this time their increase was noticeable. The number of foreign born has rapidly diminished. In 1890 there were 323,932 persons of foreign birth in the state, and 282,342 in 1905; or, instead of being 16.9 per cent of the total population as in 1890, they now constitute 12.8 per cent. The colored continue to increase and now form a slightly larger proportion than previously.

This movement, particularly of the foreign born, is not peculiar to Iowa. According to the census of 1900 there was a relative decrease in their numbers in every state and territory comprising the North, Central and Western divisions, the decrease at that time being particularly noticeable in Michigan,

Wisconsin, Minnesota, North Dakota, South Dakota, Wyoming, Utah, Nevada and California. The reason for the change is not difficult to discover. This class is increased alone by immigration and at present the land has so advanced in value that the foreigner prefers to seek newer areas, that offer a home at more reasonable figures. Moreover, the higher age class of the foreigner operates to the diminution of their numbers. The five counties showing the highest per cent of these several classes are as follows:

Native White Parents.	Native White Foreign Parents.	Foreign Born.	Colored.
Wayne ..... 90.1	Iowa ..... 52.3	Buchanan ..... 29.9	Monroe ..... 13.8
Davis ..... 89.0	Winnebago ..... 51.4	Sioux ..... 28.3	Lee ..... 4.2
Decatur ..... 88.4	Worth ..... 50.1	Winnebago ..... 23.2	Polk ..... 2.7
Clarke ..... 88.4	Winneshek ..... 47.7	Worth ..... 22.7	Mahaska ..... 2.1
Madison ..... 84.9	Sioux ..... 47.0	Lyons ..... 21.8	Appanoose ..... 1.7

The counties, showing the highest percentage of native white of native parents, are in the southern portion of the state about midway between its eastern and western borders. In all, 61 counties have over 50.0 per cent of this class of persons. The counties in which they are dominant are those in the central and southeastern portions of the state, the exceptions being: Taylor and Van Buren in the south; Iowa, Tama, Grundy, Butler, Franklin and Bremer in the north central, and Shelby, Audubon, Crawford and Carroll in the western part. The native white of foreign parents, with the exception of Iowa county in the central portion of the state, are of greatest relative importance in the northern tier of counties. It is in this northern and northwestern section and along the Mississippi river that the largest percentage of foreign born is found. In the northwestern section, Dickinson, O'Brien, Clay, Cherokee and Woodbury must be excepted, and along the Mississippi, Jackson, Muscatine and Lee counties, in which group the native constitute over 50.0 per cent.

The colored population, not including the Indians of Tama, is found in greatest numbers in Monroe county. The 3,373 colored persons in that county constitute 13.8 per cent of the total population and exceed the foreign born by 2.7 per cent. Polk county is next in order, if numbers are considered, but the 2,652 colored constitute but 2.7 per cent of its total population, while the 1,587 colored persons in Lee county make up 4.2 per cent of its inhabitants. Outside of this area, in which coal mining is one of the principal industries, the colored population seldom exceeds one-half of 1 per cent and is usually considerably below this amount.

The above list of towns, selected from those given in general table No. 27, p. 680, shows the highest per cent a given nativity forms of the total population of the respective cities. Thirty-seven of those of 1,000 population or over have 80.0 per cent or over native white of native parents. Of these, the town of Milton, Van Buren county, is first, with 93.7 per cent, which is a higher proportion than any other nativity has in the cities of this class. Marengo has the largest proportion of native white of foreign parents, 67.4 per cent, and Williamsburg with 52.7 per cent is second. The per cent of foreign born is less than the other nativities, but 19 having 20.0 per cent or over. Story City, in which the largest proportion is found, has but 33.3 per cent. The colored are most heavily represented in Ottumwa and Keokuk, with 8.9 and 8.4 per cent respectively.

## GENERAL NATIVITY AND SEX.

TABLE NO. XI.

*Number of males to 1,000 females according to nativity and age, 1905.*

Age Class.	Native White Native Par- ents.	Native White Foreign Par- ents.	Foreign Born.	Colored.	Total.
Under 5 years of age.....	1,031	1,041	1,077	1,010	1,034
5 and under 10 years of age	1,022	1,023	1,069	937	1,022
10 and under 18 years of age.....	1,013	1,019	1,129	1,057	1,019
18 and under 21 years of age.....	953	961	1,263	972	953
21 and under 45 years of age.....	1,016	990	1,234	1,227	1,088
45 years and over.....	1,090	1,133	1,233	1,450	1,149
Total .....	1,030	1,017	1,229	1,171	1,051

There are 54,517 more males than females in the state, which gives a proportion of 1,051 males to every 1,000 females. All nativities, including the colored, show this disproportion. The foreign born, due to the greater immigration of males, perhaps, have the greatest excess, 1,229 per 1,000 females. Among the colored, where immigration is supposed to play no part, the excess is not so great, 1,171 per 1,000 females. It should be remembered, however, that the Negro migrates from the south and that the excess shown may be in part due to that fact. The sexes are nearest equal in numbers in the native white, those of native parentage showing a greater excess of males than those of foreign parentage. The numbers are, respectively, 1,030 for the native white of native parents and 1,017 for native white of foreign parents.

The same disproportion exists in all age classes except that from 18 and under 21 years, where there are 953 males to every 1,000 females. Native white of foreign parents also have an excess of females among those 21 to 45 years of age, and the colored among children 5 and under 10 years of age.

\*The foreign born includes 34 males and 18 females, a total of 52 colored born in foreign countries. These are also included under the colored, for which reason total items will not foot grand total which is correct.

## GENERAL NATIVITY AND AGE.

From table No. XII it appears that 233,843 persons or 10.6 per cent of the total population are less than five years of age. Practically the same number, 242,364 or 10.9 per cent are five and under ten years of age. The class ten years of age and under eighteen, due primarily to the longer age period, numbers

373,309 or 16.9 per cent of the total population. The shorter age period, eighteen and under twenty-one, has but 6.1 per cent, while the remaining age classes show 35.1 and 20.4 per cent respectively, the number of persons twenty-one years of age and under forty-five being 774,899 and forty-five years of age and over, 451,812.

Due to variation in the length of the age period, the above table has been constructed primarily for the comparison it furnishes of the several nativities. Children under five years of age form a larger proportion of the native white of native parents than in the other groups of the white or the colored population. It is to be expected that but few persons of foreign birth would be found in this age period, but that the native children of native parents should constitute 13.3 per cent of the total population of that group, while those of foreign parentage are only 9.9 per cent of their nativity, is hardly to be anticipated. It is doubtless due to the fact that many of the foreign born reach here later in life, after a portion of their children have been born abroad. The 1000 children under five years of age, foreign born, and the 1,964, five and under ten years of age, would bear out this theory. For this reason the foreign born are represented primarily in the classes above twenty-one years of age, 40 per cent of all the foreign born being twenty-one and under forty-five years of age, and 53.8 per cent forty-five years or over. These percentages are particularly striking in the latter class, inasmuch as the colored show only 19.1 per cent; the native born of native parents, 18.2; the native born of foreign parents, 10.3, and the state as a whole, 20.4 per cent.

The predominance of males among the foreign born and the colored class reflects itself in the percentage of each sex in the several ages. In each group, except those forty-five years and over, the females show a higher percentage than the males; that is, a larger proportion of the females are found in the groups of less than forty-five years of age. The foreign born and colored, however, are not alone in this feature, both native white of native parents and native white of foreign parents show a larger proportion of males over forty-five years of age. The colored males are proportionally greater in all age classes over twenty-one years of age.

## SCHOOL AGE.

TABLE NO. XIV.

*Number of person of school age classified according to general nativity and color, and percent each nativity formed of the total school population in 1890, 1900 and 1905.*

General Nativity and Color.	Number of School Age.			Percentage.		
	1890	1900	1905	1890	1900	1905
Native White Native Parents.....	398,055	465,841	463,289	56.5	60.7	62.6
Native White Foreign Parents.....	258,520	273,390	259,600	38.6	35.6	34.6
Foreign Born.....	44,841	24,554	16,430	6.4	3.2	2.2
Colored.....	3,768	4,085	4,818	.5	.5	.6
Total.....	701,182	767,870	749,498	100.0	100.0	100.0

According to the above table the number of persons of school age declined 18,374 or 2.38 per cent from 1900 to 1905. This diminution was entirely due to reduction in the number of persons, native white of foreign parents and the foreign born. The total number of persons of school age in 1905 was 749,496, of whom 377,159 were males and 372,337 females. This total includes all persons 5 years of age and under 21, which, according to the law of the state, constitutes the school population. If only those 5 years of age and under 18 were taken, as in many states, the number would be 310,969 males and 304,731 females, a total of 615,700. The native white of foreign parents were 13,762 less in number in 1905 than in 1900, or those of school age in this nativity show a decrease of 5.0 per cent. The decline among the foreign born is much greater. In 1900 they had a school population of 24,554, and at present, 16,430. This is a decline of 8,124 or 33 per cent in the last five years. The native white of native parents have gradually increased both in numbers and per cent of total school population. They constituted 56.5 per cent of those of school age in 1890, 60.7 in 1900, and 62.6 in 1905. From the reduction of the other classes above indicated, it results that the native white of foreign parents now constitute 34.6 per cent of the school population as against 36.6 per cent five years previous. The foreign born shows the reduction before mentioned by declining from 6.4 per cent of the school population in 1890 to 2.2 per cent in 1905. The colored have slightly increased in numbers in the same period.

# MALES OF MILITIA AGE.

TABLE NO. XV.

*Males of Militia age, 18 to 44 years inclusive, in 1890, 1900, 1905, classified according to general nativity and color.*

General Nativity and Color.	No. of Militia Age.			Percentage.		
	1890	1900	1905	1890	1900	1905
Native White Native Parents .....	210,806	248,701	238,090	52.8	51.2	51.7
Native White Foreign Parents....	98,410	149,089	152,498	24.6	31.8	33.1
Foreign Born.....	87,797	79,470	66,205	22.0	16.7	14.3
Colored .....	2,674	8,520	4,046	.6	.8	.9
Total.....	399,687	475,780	460,840	100.0	100.0	100.0

The total number of males of militia age in 1905 was 460,840, of whom 238,090 or 51.7 per cent were native white of native parents; 152,498 or 33.1 per cent native white of foreign parents; 66,205 or 14.3 per cent foreign born, and 4,046 or .9 per cent colored.

The tendency on the part of the foreign born to diminish, as seen in the school age, may again be observed here. In 1890 they constituted 22 per cent of the total number of this age in the state; in 1900, but 16.7 per cent; and in 1905 but 14.3 per cent, the actual number declining 8,327 in the first period and 13,265 in the latter. Contrary to the experience pointed out in school age, however, the native white of native parents have decreased in number since 1900 and in percentage of the total since 1890, while the native white of foreign parents have advanced both in numbers and per cent of the total.

## MALES OF VOTING AGE.

TABLE NO. XVI.

*Males of Voting Age, 1890, 1900, 1905, Classified According to General Nativity and Color.*

General Nativity and Color.	Number of Voting Age			Percentage.		
	1890	1900	1905	1890	1900	1905
Native White Native Parents. ....	273,853	321,513	320,814	52.5	50.6	50.4
Native White Foreign Parents. ....	98,076	161,246	163,944	16.9	23.8	25.8
Foreign Born. ....	155,574	157,906	146,220	29.9	24.9	23.0
Colored. ....	8,328	4,633	5,290	.7	.7	.8
Total. ....	520,832	635,298	636,208	100.0	100.0	100.0

The above table, based on the figures in table No. XIII, gives the voting strength of the state, if age alone constituted eligibility to vote. No consideration as to residence or naturalization is here made.

On this basis, in 1905 there were 636,208 males of voting age in the state, an increase of 910 over the number shown by the federal census of 1900. The native white of native parents supply over half of this number, the native white of foreign parents a fourth, and the foreign born and colored the remainder. The apparent tendency is for the native born of native parents to diminish slightly at each enumeration, the foreign born to lose large numbers and the native white of foreign parents to increase rapidly. This increase is shown by the per cent they formed of the total voting population: in 1890, 16.9 per cent; 1900, 23.8 per cent, and in 1905, 25.8 per cent.

TABLE NO. XVII.

## NATIVE BORN.

The native born includes those previously designated as native born of native or foreign parentage and colored. The total number of these three classes was 1,927,755, of whom 1,379,981, or 71.6 per cent, were born in Iowa. The other states of the union contributed in very unequal proportion. Illinois furnished 7.1 per cent, Ohio 3.8 per cent, New York 2.2 per cent, Pennsylvania 2.3 per cent, Wisconsin 2.1 per cent, Missouri 1.7 per cent and Nebraska 1.3 per cent. None of the other states, individually considered, contributed 1 per cent of the present native population. Comparing these percentages with those derived from the number of persons in Iowa less than five years, (see first column table No. XVII,) it will be noted that a change has occurred in the native migration to this state. The eastern states and Wisconsin are not as well represented as previously and Missouri and Nebraska have advanced proportionally. The per cents for this residence period are as follows: Illinois 8.4 per cent, Ohio 1.4 per cent, New York 1 per cent, Pennsylvania 1 per cent, Wisconsin 1.8 per cent, Missouri 3.5 per cent and Nebraska 2.1 per cent.

TABLE NO. XIX.

*Native born with state of birth other than Iowa, 1905.*

Age Classes.	Number.	Per cent.
Under 5 years of age .....	9,757	1.8
5 and under 10 years .....	21,167	3.8
10 and under 18 years .....	48,292	8.8
18 and under 21 years .....	20,816	3.8
21 and under 45 years .....	211,196	38.6
45 years and over .....	236,616	43.2
Total.....	517,784	100.0

The residents of the state born outside of Iowa are chiefly in the higher age classes. Those 45 years of age or over number 236,616 and constitute 43.2 per cent; those 21 and under 45 years are next in order and make up 38.6 per cent of this group. The remaining age classes have comparatively few representatives, which may be taken to mean that individuals rather than families have migrated to the state in recent years.

**FOREIGN BORN.**

Over one-third of the foreign population of the state was born in Germany. No other single country has so large a representation. The 110,167 Germans reported, or 39.03 per cent of the foreign born, outnumber those from Sweden, which ranks second as a birthplace, four to one. If Norway is considered with Sweden, the two countries contributed 18.54 per cent of the foreign population, or almost half as many as Germany. The 17,269 persons from Denmark constitute 6.12 per cent of the foreign born, and added to those from Norway, Sweden and Germany make 63.69 per cent of our foreign population who acknowledge a kindred area in North Europe as a birthplace.

Some indication of the trend of foreign migration to the state may be obtained by a study of the period of residence of the several nationalities in the state. In general it may be concluded that if a high percentage for a given country is found in a period of short residence in the state that country is now contributing a larger proportion of emigrants than formerly, while if the higher percentage is in a longer period of residence the number coming to the state from that country is proportionately smaller. With this basis it appears that Austria, Hungary, Italy and Russia show comparatively high percentages in the shorter periods of residence and are therefore increasing their migration to Iowa. England, Germany, Ireland, Norway and Sweden are older contributing nations and at present are not coming in proportionate numbers. Naturally the sum total of these later nationalities even in recent years is larger than those of the first group but their numbers are not increasing in the same proportion.

# NATURALIZATION AND YEARS IN UNITED STATES.

TABLE NO. XXIII.

*Foreign born, naturalized and not naturalized, according to age classes and years in the United States.*

Age Classes and Years in United States.	Number.			Per cent.	
	Naturalized.	Not naturalized.	Total.	Naturalized.	Not naturalized.
21 and under 45 years of age	50,542	5,411	55,953	90.3	9.7
5 and less than 8 yrs. in United States.....	1,035	1,286	2,321	44.6	55.4
8 and less than 10 yrs. in United States.....	978	482	1,458	66.9	33.1
10 and less than 20 yrs. in United States.....	19,709	2,306	22,015	89.5	10.5
20 yrs. or more in United States.....	23,177	952	24,129	98.7	1.3
Years in United States unknown.....	645	385	1,030	62.6	37.4
45 years of age and over.....	78,944	4,199	83,143	95.0	5.0
5 and less than 8 years in United States.....	148	189	337	43.9	56.1
8 and less than 10 years in United States.....	106	104	210	50.5	49.5
10 and less than 20 years in United States.....	5,172	1,223	6,395	80.9	19.1
20 yrs. and over in United States.....	72,723	2,244	74,967	97.1	2.9
Years in United States unknown.....	795	439	1,234	64.6	35.4
Total—21 years of age or over.....	129,486	9,610	139,096	93.1	6.9
5 and less than 8 yrs. in United States....	1,138	1,475	2,613	44.5	55.5
8 and less than 10 yrs. in United States....	1,082	586	1,668	64.8	35.2
10 and less than 20 yrs. in United States....	24,881	3,529	28,410	87.5	12.5
20 yrs. and over in United States.....	100,900	3,198	104,098	96.9	3.1
Years in United States unknown.....	1,440	824	2,264	63.6	36.4

The returns show that there were 139,096 foreign persons who had been in the United States a sufficient length of time to have obtained naturalization papers, and that 9,610 of these, or 6.9 per cent of their number, had not done so. It further appears from the above table that 44.5 per cent of those who have been in the United States 5 and less than 8 years are naturalized; that 64.8 per cent of those who have been here 8 and less than ten years have taken out their final papers, and in the case of about three-fourths of the foreign born subject to naturalization, which is the proportion that have been here 20 years or over, 96.9 per cent are voters and but 3.1 per cent remain without the right of suffrage.

## CONJUGAL CONDITION.

TABLE NO. XXIV.

*Conjugal condition, summary for states, 1905.*

Conjugal Condition.	Number.			Per Cent.		
	Male.	Female.	Total.	Male.	Female.	Total.
Single .....	663,453	576,596	1,240,029	58.6	53.5	56.1
Married .....	429,609	427,262	856,871	37.9	39.6	38.8
Widowed .....	31,858	64,712	96,610	2.8	6.0	4.4
Divorced .....	8,976	4,858	8,834	.4	.5	.4
Separated .....	3,325	4,881	7,706	.3	.4	.3
Total .....	1,132,241	1,077,909	2,210,050	100.0	100.0	100.0

1,240,029 persons or 56.1 per cent of persons in the state are unmarried, 856,871 or 38.8 per cent married, 96,610 or 4.4 per cent widowed, 8,834 divorced, and 7,706 separated or .4 and .3 per cent respectively. The males show the highest per cent of single persons, 58.6 per cent of the total males belonging to this class and but 53.5 per cent of the females. Of the married, the females are proportionally in excess, 39.6 per cent of their number being in this class as against 37.9 per cent of the males. Table Number XXV gives the number of persons, male and female, single, married, widowed, divorced or separated, and table Number XXVI, by means of percentage, permits a comparison of the several counties. In these tables, persons of all ages are considered.

The highest relative number of single persons are in Sioux county, but Taylor, Winnebago, Worth, Lyon, Dubuque, Ida, Kossuth, Osceola and Pocahontas each have over 60 per cent among their number unmarried. A greater proportion of the population of Van Buren county are unmarried than in other counties of the state. The married constitute 43.2 per cent of the population. Decatur, Davis and Jasper may be named in order as having a relatively large married population. In all, there are 26 counties of the state that have over 40 per cent of their number married. The majority of these are counties in which the native born of native parents are largely in excess.

The divorced or separated are a small factor. Seldom is there over one-half of 1 per cent in either of these classes. Wapello has .7 divorced, .8 separated; Lee .6 and .7 per cent respectively, and Louisa .6 and .5 respectively.

## URBAN POPULATION.

TABLE NO. XXVIII.

*Total population and number of inhabitants of all incorporated places,  
1890, 1900 and 1905.*

	1890.	1900.	1905.
Total Population .....	1,911,896	2,231,853	2,210,050
Population of Incorporated Places.....	700,162	973,178	1,067,936
Per cent Urban .....	37.1	43.6	48.8
Per cent Urban Increase .....		38.9	9.8

In the above table urban population is made to include all persons living in the incorporated towns of the state. With this understanding of the term, the total urban population in 1905 was 1,067,936 or 48.3 per cent of the total population. Comparing this number with previous enumerations, it will be seen that those living in the cities and towns of the state are increasing both in numbers and the proportion they bear to the total population.

The census of 1890 reported 700,162 persons or 37.1 per cent as living in the cities and towns; by 1900 the number had increased to 973,178, or 43.6 per cent of the total; and the present census gives the numbers indicated above. The cities and towns, however, have felt the effect of the decline in the state population. Their rate of increase from 1890 to 1900 was 38.9 per cent or 3.89 per cent annually; from 1900 to 1905 the increase was 9.8 per cent or 1.96 per cent annually.

TABLE NO. XXIX.

*Population of the state living in cities and towns having specified number  
of inhabitants. Total increase or decrease in each class and per cent  
of the same 1900 and 1905.*

Size of Cities.	1900.			1905.			Increase.* Decrease.—	
	No.	Popula- tion.	Per cent. of Urban.	No.	Popula- tion.	Per cent. of Urban.	N'mb'r.	Per cent.
25,000 and over.....	6	218,269	22.4	7	277,624	26.0	*59,365	*27.2

500 and under.....	301	91,878	9.4	387	103,098	10.1	*16,220	*17.6
Total.....	684	973,178	100.0	690	1,067,936	100.0	*95,059	*9.8

The movement of the population toward the cities and towns is primarily a movement to the larger cities of the state. The towns of 25,000 or over have gained 59,365 inhabitants within the past five years. This is an increase of 27.2 per cent in their population and represents 62.4 of the total urban gain of the

state. The towns next in order of increase are those of 500 population or under, which show an advance of 18.9 per cent. The group of towns having a population of from 2,500 to 8,000 shows a decline which is most marked in places of from 2,500 to 4,000 population. It is almost justifiable to say that towns of from 1,000 to 2,500 belong to the class showing a decline, as their increase was but 2.4 per cent, while the average for the state was 9.8 per cent. The remaining groups advanced at about the normal rate, as shown by the general state increase.

The growing importance of the large towns is noticeable. In 1890 places of 25,000 population represented 20.7 per cent of the total urban; in 1900, 22.4 per cent, and in 1905, 26.0 per cent. No other group shows this increasing influence, although it should be noted that towns of 1,000 or less population contain a slightly higher proportion of the total urban than formerly.

TABLE NO. XXX.

*General nativity of inhabitants of towns of 1,000 or over in 1905 compared with total state population.*

General Nativity.	Number in State Population.	Number in Cities of 1,000 Inhabitants or over.	Per cent in Towns of 1,000 Inhabitants or over.
Native White Native Parents .....	1,264,448	274,647	21.7
Native White Foreign Parents .....	848,532	232,218	34.3
*Foreign Born .....	232,296	103,849	36.8
Colored .....	14,831	9,146	61.6
Total .....	2,210,050	809,860	36.6

\*Includes 52 colored, born in foreign countries, which also appear under the colored. Totals are correct.

The negro population is not agricultural; 61.6 per cent of their total number are living in towns of 1,000 inhabitants or over. The foreign born also show a greater tendency to congregate in towns than the native white. Their population, however, is not much greater than the native white of foreign parents, 36.8 per cent as against 34.3. The native white of native parents have but about one-fifth of their number in these towns, or 21.7 per cent of their total number.

TABLE NO. XXXI.

*List of towns of 1,000 inhabitants or over showing an increase of 20 per cent or more in past five years.*

City or Town.	Number.			Per cent Increase.
	1900.	1905.	Inc.	
Waterloo .....	18,071	12,580	5,491	43.65

Woodbine .....	1,507	1,255	252	20.08
Grinnell .....	4,684	3,860	774	20.05

The above list of towns selected from the cities and towns having 1,000 population or over, given in general table No. 27, page 680, are those having 20 per cent or over of increase within the past five years. Among this number the greatest proportional increase was made by Waterloo, county seat of Black Hawk county. Its numerical gain was 5,491, representing an increase of 43.65 per cent on the population of 1900. The advance for the same city from 1895 to 1900 was 48.17 per cent. Albia and Ames follow in close order with 36.96 and 35.92 per cent, respectively, and in all, sixteen towns of this size have increased over 20 per cent.

The five towns of this group showing the largest decrease were Missouri Valley, 16.96; Fonda, 14.49; Lake City, 14.10; Hamburg, 14.05, and Moulton, 13.73 per cent.

The urban population, as shown in Table No. XXVII, forms the largest per cent of the total in Polk county. Its 80,939 persons living in the cities or towns of the county making 83.49 per cent of the total. Woodbury is next highest with 76.90 per cent, having advanced from fifth place in 1895 to its present rank.

The ten counties in the order of their rank at the past three enumerations are as follows:

TABLE NO. XXXII.

*Per cent of urban population to total.*

## SCHOOL POPULATION AND ATTENDANCE.

TABLE NO. XXXIII.

*Number and proportion of population of school age of the several age periods attending school a part of the year, 1904.*

Age Class.	Males.			Females.			Total.		
	No. of School Age.	No. At-tend-ing School.	Per Cent At-tend-ing.	No. of School Age.	No. At-tend-ing School.	Per Cent At-tend-ing.	No. of School Age.	No. At-tend-ing School.	Per Cent At-tend-ing.
5 and under 10 yrs. of age	124,621	91,915	75.0	119,849	90,700	75.6	242,364	182,615	75.3
10 and under 18 yrs. of age	188,436	161,844	85.6	184,871	157,998	85.4	373,307	319,842	85.6
18 and under 21 yrs. of age	66,203	15,508	21.8	67,621	12,184	18.0	133,824	27,687	20.7
Total.....	377,160	268,762	71.3	372,335	260,882	70.1	749,495	529,644	70.6

Of a total number of 749,495 persons of school age, 529,644 or 70.6 per cent of the total attended school some portion of the year 1904. These numbers include all persons 5 years of age and under 21, and, inasmuch as but 20.7 of those 18 years of age and under 21 attended school a portion of the year, is slightly misleading. Considering, therefore, only those between the ages of 5 and under 18, the per cent of attendance is raised to 81.5. In the age class 5 and under 10 years, there are 242,364 children, of whom 182,615 or 75.3 per cent receive some schooling during the year. In the next age class, 10 and under 18 years, 85.6 per cent of the total number of that age were recorded in school. In these age classes there is practically no difference in the proportion of males and females, but in the age class 18 and under 21 it is noticeable that 21.8 per cent of the

males of school age are in attendance a portion of the year, and but 18.0 per cent of the females. Due to this fact, 71.3 per cent of the males of school age attended a portion of the year 1904 and but 70.1 per cent of the females.

TABLE NO. XXXIV.

*Number of persons of given school ages attending school a given portion of the year.*

## FEMALE.

5 and under 10 yrs of age	7,195	7.9	9,682	10.7	33,668	37.1	40,155	42.3	90,700	100
10 and under 18 yrs of age	5,108	3.2	8,976	5.7	58,276	36.9	85,639	54.2	157,997	100
18 and under 21 yrs of age	1,281	10.5	1,566	12.8	2,268	18.6	7,085	58.1	12,155	100
Total .....	13,582	5.2	20,214	7.8	94,217	36.1	132,879	50.9	260,842	100

## TOTAL.

5 and under 10 yrs of age	13,994	7.7	18,937	10.4	69,227	37.9	80,457	44.0	182,615	100
10 and under 18 yrs of age	15,095	4.7	28,087	8.7	114,520	35.7	161,639	50.9	319,841	100
18 and under 21 yrs of age	5,161	18.6	4,776	17.3	4,740	17.1	13,011	47.0	27,685	100
Total.....	34,250	6.5	51,800	9.8	188,487	35.6	255,107	48.1	529,644	100

The regularity of attendance in all age classes is shown in the above table. It has already been noted that 70.6 per cent of those of school age attended school some portion of the year. The table indicates that 34,250 of these persons, or 6.5 per cent of their number, attended school less than four months; that 51,800 or 9.8 per cent attended school four and less than six months; 188,487 or 35.6 per cent were in school six and less than nine months; and 255,107 or 48.1 per cent of the school population, attending school, received nine months training. If the several ages and classes are considered, a slight modification will be noted in these figures. The attendance record of children 5 and under 10 years of age, as might be expected, is poor. 80,457 or 44 per cent of their number are reported as having attended school nine months. A slightly smaller number, 69,227 or 37.9 per cent, were in school

six and less than nine months, and 10.4 and 7.7 per cent attended four and less than six months, and less than four months, respectively. The greatest regularity in attendance is shown in the class 10 and under 18 years of age. In this, only 50.9 per cent were in school a nine-months year. In other words, one-half of the 85.5 per cent of those of this age, who attended school, are full-time pupils; 35.7 per cent more attended from six to nine months, making 86.6 per cent that received at least six months schooling, leaving 13.4 per cent who received less than that amount.

A greater proportion of females attended school the full year than of males, with the exception of those 5 and under 10 years of age, where the males slightly exceed the females. The greatest variation between the sexes is naturally in the age class 18 and under 21 years of age. 25 per cent of the males in this class are in school less than four months, and only 10.5 per cent of the females. This causes the record of those in school nine months or over to show that 19.9 per cent more females receive an entire year's training than the males.

### ILLITERACY.

TABLE NO. XXXV.

*Literate and illiterate by sex and age classes, 1905.*

Age Classes.	Number.			Per Cent.		
	Male.	Fem'l.	Total.	Male.	Fem.	Total.
Persons of school age.....	377, 169	372, 537	749, 496	37.2	38.6	37.9
Attending school a portion of the year.....	268, 761	260, 881	529, 642	71.8	70.1	70.6
Not attending school a portion of year.....	108, 398	111, 456	219, 854	28.7	29.9	29.4
Able to read or write.....	106, 496	109, 990	216, 486	98.2	98.7	98.5
Not able to read or write.....	1, 894	1, 457	3, 351	1.8	1.3	1.5

21 years of age and under 45.....	394, 636	380, 264	774, 900	.....	.....	.....
Able to read or write.....	380, 207	377, 054	767, 261	98.9	99.2	99.0
Not able to read or write.....	4, 429	8, 210	12, 639	1.1	.8	1.0
45 years of age and over.....	241, 569	210, 242	451, 811	.....	.....	.....
Able to read or write.....	238, 443	200, 379	438, 822	98.7	95.7	96.1
Not able to read or write.....	8, 126	9, 863	17, 989	8.8	4.7	8.9
Total—Persons of school age and over.....	1, 013, 364	963, 843	1, 976, 267	100.0	100.0	100.0
Able to read or write.....	938, 915	848, 313	1, 787, 228	98.7	98.5	98.5
Not able to read or write.....	14, 449	14, 530	28, 979	1.4	1.5	1.5

Those of school age or over unable to read or write number 28, 979 persons, or 1.5 per cent of all those of school age or over. The majority of the illiterate are persons 45 years of age or over, their number representing 60 per cent of all the illiterates of the

state. Little variation between the males and females may be noted. In the age group 21 to 45 the females have a slightly lower percentage of illiteracy, but in the case of those above this age the figures are reversed and the females have 4.7 per cent illiterate and the males only 3.3 per cent.

## MILITARY SERVICE.

TABLE NO. XXXVI.

*Civil War Veterans living in Iowa, by state of enlistment and class of service.*

Other States.....	262	195	41	100	598
State not reported.....	234	41	24	42	341

The total number of veterans of the Civil War now residing in Iowa is 25,569. Those in the infantry service number 19,758, which is 77.23 per cent of the veterans residing in the state. The cavalry service has 4,562 survivors or 17.84 per cent; the artillery 1,029 or 4.02 per cent, and the hospital, navy and other lines of army service, 221 or .86 per cent.

Less than one-half of the surviving veterans enlisted from Iowa. The 10,488 going from this state are more than double the number enlisting from any other state and now residing in Iowa. As Illinois is the principal state from which our native population comes, it naturally ranks first in the number of veterans enlisting from other states. For the same reason Ohio is second as a birthplace for resident veterans.

TABLE NO. XXXVII.

*Age classification of Civil War Veterans living in Iowa, 1905.*

72 " " " " " " " "	295	342	637	90 " " or over. ....	16	20	36

The age is given in extended form in general table No. 23, p. 630. The summary table No. XXXVII shows that there are more veterans 62 years of age than of any single year. The principal ages are from 58 to 68 years, 17,944 belonging in this period. From this age the number gradually declines. 101 are 81 years of age, 20 are 89, and 36 have passed the 90 year mark

## OCCUPATIONS.

The number of persons employed in gainful occupations, shown in table No. XXXVIII, and general table No. 19, page 603, was 785,668. This was 64.9 per cent of the entire population of the state. By far the largest number of persons are engaged in agricultural pursuits, 40.7 per cent representing their proportion of those employed in gainful labor. Trades and transportation rank second in order of numbers, followed by manufactures, the per cents being 16.4 and 16.1 respectively. Domestic service claims 8 per cent, while those in professional service, 53,770 persons, form but 6.7 per cent. The laborers whose occupation varies at different seasons of the year have been grouped under the head of "laborers unclassified," and represent 12.1 per cent of those engaged in gainful labor.

A larger percentage of the agricultural class find employment for the entire year than any other group, the unclassified laborers showing the smallest per cent employed for this period. Of this latter class but 67.8 per cent were employed 12 months. 13.3 per cent were unemployed from one to four months of the year, 10 per cent remained idle from four to six months and 7 per cent for a longer period. This situation was almost a duplicate of that found in the manufacturing and mechanical pursuits, save that some 4 per cent more were employed the entire year than among the unclassified laborers. About three-fourths of those in professional service had continuous employment and only one-eighth were idle from one to four months. In trades and transportation and domestic and personal service the occupation was almost continuous, 93 per cent of those so employed having work the entire year.

The greatest proportion of those engaged in gainful occupations are in the age class 21 and under 45 years. This group, as shown in Table No. XXXIX, makes up 57.9 per cent of the total number employed. Those 45 years and over constitute but 27.4 per cent, the remainder being about equally divided between the other age classes. Domestic and personal service has a larger proportion of its number under 18 years of age than any of the other groups. Of the 6,277 persons reported, 5,800 were females. This represented 9.9 per cent of those in the state occupied in this line of service. The agricultural pursuits also have a comparatively high percentage of this age, but only about 2 per cent more than in the manufacturing and mechan-

ical industries. Agriculture also gives more employment to persons 45 years of age and over than the other groups. The demand in other lines of service apparently concentrates on the more productive age classes, those 18 and under 45 years of age. This is shown by the presence of 67.7 per cent of those in the professional service and 63.7 per cent in trade and transportation in the age group 21 to 45 years as against 54.3 per cent in the agricultural pursuits.

Of those employed in trade and transportation, Table No. XL, the bankers and brokers show the highest percentage having occupation for the entire year. 98.6 per cent of their number have 12 months employment, while 93.1 per cent is the proportion for the entire group. The draymen, horsemen and teamsters, although 84.5 per cent of their number are employed the entire year, show the least degree of regularity of employment of any industry in this group. Salesmen, clerks and saleswomen follow close upon the draymen and others with 87 per cent employed the entire year. This group has the largest proportion unemployed for six months or over of any industry and is only exceeded by the draymen in the per cent unemployed for four and less than six months.

The manufacturing and mechanical pursuits, Table No. XL, show less regular employment. The entire group has but 71.6 per cent employed the entire year. 11.1 per cent are idle more than one and less than four months, 8.5 per cent four and less than six months and 6.9 per cent more than six months of the year. Of the several industries in this group, the miners and quarrymen are lowest in the proportion employed the entire year. Only 35.3 per cent of their number have employment for 12 months. 22.9 per cent are unemployed from one to four months, 20.5 per cent four and less than six months and 19 per cent six months or over. The masons are employed somewhat more than the miners and quarrymen, but only 48.5 per cent of their number had work the entire year, and 20.6 per cent were idle four and less than six months. The photographers, on the other hand, were first in permanency of employment in their group, 94.3 per cent of their number being employed the entire year. They are followed by the boot and shoe-makers, of whom 90 per cent had continuous employment.

## AGRICULTURE.

TABLE NO. XLI.

*The number of Farms owned by the occupants or occupied by renters, their acreage and value of the land, buildings and implements, 1904.*

	Farms Owned by Occupants.	Farms Occupied by Renters.	Total.	Percentage.	
				Owned by Oc- cupants.	Occupied by R'ters
Number of Farms.....	188,224	70,939	209,163	86.1	33.9
Number of Acres.....	[1] 21,926,661	11,801,448	33,228,109	66.6	34.0
Land Value.....	984,204,235	587,902,214	1,552,106,449	63.4	36.6
Building Value.....	218,813,327	84,937,648	803,750,975	72.1	27.9
Implement Value.....	27,749,880	18,462,038	41,232,868	67.8	32.7

[1] Includes 2,044,197 acres rented by owners.

Returns were made for 209,163 farms, with a land value of \$1,552,106,449.00. The buildings upon this land had an estimated value of \$303,750,975.00, and the tools and implements, \$41,232,368.00. A fraction more than a third of the farms of the state are occupied by renters, who control 34 per cent of the farm land representing 36.6 per cent of the total value. That is, the renters of the state occupy land of proportionally greater value than the owners. There is, however, a far greater contrast in the value of buildings upon the rented farms. They are apparently far cheaper structures, representing but 27.9 per cent of the value instead of a third as would be their proper proportion. Their implements, too, are below the average although the difference in this is not so great as with the buildings.

TABLE NO. XLII.

*Tenure of Farms according to nativity, 1904.*

Number.	Native Born White.	Foreign Born.	[1] Total.	Percentage.	
				N. B. White.	Foreign Born.
Farms owned.....	93,651	39,907	133,551	70.2	29.8
Farms managed.....	4,020	620	4,643	86.6	13.4
Farms rented for cash.....	31,581	10,154	41,743	75.7	24.3
Farms rented for share.....	19,270	2,999	22,272	86.5	13.5
Farms rented for cash and share.....	5,507	1,415	6,925	79.6	20.4
Total number rented.....	53,858	14,568	70,939	79.5	20.5
Total.....	154,029	55,095	209,163	73.7	26.3

[1] This total includes 49 farms operated by colored persons not otherwise shown.

Summarizing general table No. 37, p. 717, and calculating the percentages, the above table is obtained. Persons of foreign

birth own 39,907 farms in the state or 29.8 per cent of the total. Inasmuch as the foreign born males of voting age form 23 per cent of the potential voters of the state, it may be assumed that a greater proportion of foreigners own their farms than natives. It is perhaps true that more native than foreign women own farms and more natives under the age of 21 are owners of farms than foreigners of this class, but the margin between the per cents is great enough to allow for these factors and still leave the foreign born proportionally ascendant.

That the renters prefer to pay cash rent is evidenced by 58.1 per cent of all the rented farms being held in this manner. It may further be remarked that the foreign born show a preference for this form of tenure, while the native more frequently rents on shares or pays cash and share rent.

Below is appended a summary of the several tables showing the resources and products of the farms of Iowa. The general tables contain an itemized statement, by counties, of the farm animals owned and their value as reported to this bureau; also statements showing the total value of the several crops and, where possible, their quantity and acreage.

TABLE NO. XLIII.

*Farm Grains.*

(Summary General Table, No. 39, P. 727.)

	Acres.	Bushels.	Value.
Corn .....	9,542,956	<sup>*</sup> 346,577,988	\$117,688,090
Wheat .....	517,274	5,859,747	4,787,042
Oats .....	4,815,637	134,150,609	34,225,390
Barley .....	424,680	15,769,605	5,334,820
Rye .....	63,035	924,950	480,080
Buckwheat .....	10,690	118,045	84,279

\* The number of bushels of corn, as reported in Table 39, P. 727, was a typographical error.

TABLE NO. XLIV.

*Acres, Quantity and Value of Grass Seeds, Potatoes and Sweet Corn.*

(Summary General Table, No. 41, P. 737.)

	Acres.	Bushels.	Value.
Flax Seed .....	24,997	300,943	\$ 320,227
Clover Seed .....	30,138	43,632	234,633
Timothy Seed .....	332,275	1,357,362	1,507,631
Other Grass Seeds .....		52,898	37,690
Irish Potatoes .....		16,653,728	4,520,780
Sweet Potatoes .....		284,624	141,816
Sweet Corn .....		1,634,895	594,262

tion above mentioned, amounted to \$111,444,929.00, or an increase of \$8,711,826.00. Further comparisons might be made, but the changed base would render them of little value.

## MINERAL PRODUCTION.

TABLE NO. XLIX.

*Value of the Mineral Products of Iowa, 1897-1904.*

Years.	Coal.	Clay.	Stone.	Gypsum.	Lead and Zinc.	Iron Ore.	Total.	Per cent of Increase
1904 .....	\$ 10,439,496	\$3,507,576	\$542,170	\$ 489,432	\$ 2,619	\$ .....	\$14,961,293	2.5
1903 .....	10,439,139	3,038,533	597,085	523,008	3,013	.....	14,598,708	22.4
1902 .....	8,053,779	2,843,591	673,861	937,735	11,178	.....	11,924,644	-2.3
1901 .....	8,051,808	2,774,200	794,278	582,500	16,500	4,876	12,204,160	17.4
1900 .....	6,977,466	2,395,483	694,886	398,750	22,194	2,189	10,335,923	6.0
1899 .....	6,137,576	2,203,728	809,924	600,000	50,642	3,465	9,805,235	25.8
1898 .....	5,123,187	2,057,022	563,586	.....	43,784	.....	7,787,579	4.1
1897 .....	5,098,103	1,591,866	597,144	195,090	5,616	250	7,477,979	....

The several mining products produced in Iowa are indicated in the above table. Their value at last report was \$14,961,293.00 which is more than double the estimate for 1897. The advance has been very irregular, and presents a rhythmic variation that is apparently without explanation. Every alternate year shows a marked decline in the rate of increase. For example, the per cent of advance in 1898 was 4.1, in 1899, 25.8. Similar variations occur to date and if the process continues we may expect the year 1905 to show a large per cent of increase.

## COAL.

According to the report of the \*United States Geological Survey for the year 1903, Iowa held ninth place in the output of coal, producing 1.8 per cent of all the coal mined in the United States. The same authority gives the state seventh rank if volume of product is considered, Iowa coal representing 2.1 per cent of the total bituminous tonnage. The total production for that year was 6,419,811 short tons valued at \$10,563,910. This amount is slightly in excess of that given by the Iowa Geological report, but the variation is so slight as to verify rather than invalidate the figures given. The federal figures for the year 1904 are not yet available, but the Geological Bureau of the state places the production at 6,507,655 short tons. This is a slight increase in tonnage, but not enough to materially change the value.

\* Mineral Resources of the United States, 1903. Page 465.

TABLE NO. L.

*Production of Coal from 1860-1904.*

Year.	Quantity.	Year.	Quantity.
1860	41,920	1882	3,920,000
1861	50,000	1883	4,457,540

		**1904	6,507,655

\* Iowa Geological Survey, Volume XV, Page 21.

In 1840, according to the Federal Census of that year, Iowa produced four hundred tons of coal. From this time until 1860 the reports of the total state production are too unreliable for serious comment. Even until 1865 little dependence may be placed upon the figures given. The advance in production from this date until 1873 was slow, but the year following, 1874, witnessed an increase of almost 100 per cent in the amount produced. From this point the increase was rapid, but the greatest advance was made from 1881 to 1882, when the output increased from 1,960,000 to 3,920,000 short tons. The increment the following year was almost equal. A slight decline followed, but another maximum was reached in 1888 when the mining of 4,952,440 short tons established a new record for the state.

From this date difficulties are encountered, which cause a material decline until 1899. Labor troubles may be mentioned as one of these, but of prime importance was the competition of coal from adjoining states. River transportation and favorable freight rates enabled the Illinois producer, in particular, to compete in the Iowa field, a competition that could not be overcome for some years, and is very strongly felt even to-day.

\* Mineral Resources of the U. S., U. S. Geol. Survey, 1903, p 463.

\*\* Iowa Geological Survey, 1904, p 21.

The coal area of the state is shown in the Mineral map of Iowa, opposite page xc. It occupies the south central and southwestern portion of the state, the mining area being confined almost exclusively to the valley of the Des Moines river. Where this is not the case, as will be seen by Table No. LI, as in Page and Taylor counties, the production is small, although the increase in Appanoose, which is just beyond this area, is noticeable. As a rule the counties have shared in the advance production of recent years. Mahaska is a striking exception, however, having declined from first rank among the counties of the state in 1899, with a production of 1,273,473 tons, to fourth place with 663,943 tons produced in 1904. The advance in Monroe county has been as rapid as the decline in Mahaska, and from third place with a production of 689,004 tons, it has advanced to first place, and in 1904 produced 2,061,877 tons. The production in Polk county has shown a continued increase, and while it still holds second place among the counties, as it has done for years, the production of 1,130,608 tons in 1904 makes it a better second than ever before in its history.

## CLAY.

Eighth rank is accorded Iowa in the production of clay products for the year 1903 by the United States Geological Survey. The figures given show that the state produced 2.88 per cent of the entire output of the country. The same report gives the state like rank in the manufacture of paving brick; third in building brick, being exceeded alone by Ohio and Indiana, and second in drain tile, Ohio ranking first. It is probable that at this date the state holds first rank in the production of drain tile. A point has apparently been reached in the development of the state, where the value of the land will justify drainage and the great advance is the natural result. In 1895 the value of the product was \$290,515. A very marked advance was made in 1897, after which production remained stationary until 1901 when the value of the product amounted to \$516,714. The wet season of 1902 seems to have stimulated this branch of the industry and the following year the million mark was passed and latest reports indicate the production of \$1,321,745 of 1904 will be exceeded within the present year.

The maximum production of building brick for the year was \$1,737,256. This represented the maximum production of a progressive series of years. This valuation was but little in

excess of that of the following year, but has not been reached since that date. Recently a tendency for the output of pressed brick to increase has been apparent, although the production has not regained the point reached in 1899. The output of pavers was greatest in 1897, when the combined value amounted to \$426,056 representing a consumption of 56,315 thousand brick. The following decline in the amount consumed, until the lowest point was reached in 1900, may be attributed to defective paving laws and in the activity of the representatives of other forms of paving. At present the business is perhaps normal, although the production of 1904 represents a temporary falling off.

The ornamental brick industry has never held a prominent place in the clay output of the state. The same is true of pottery, although its production shows a gradual but fairly consistent increase. It is believed, however, that under present methods of treatment the clay is better suited to the coarser forms of production.

A product that has been but recently placed upon the market, and seems to be gaining very rapidly in favor, is the "Hollow Block." Prior to 1901 it was practically unknown, but since that date its use for structural purposes has made it prominent; and in 1904 the value of the product sold was \$164,658. It is believed that the output in this will rapidly increase and Iowa will shortly be a prominent place in its production.

## STONE.

TABLE LIV.

*Value of Stone produced for the years 1895 to 1904, inclusive.*

Limestone Used for:								Sandstone.	Total Value Stone Produced.
Year.	Building Purposes.	Flagging and Curbing.	Rip-rap Rubble, Etc.	Lime.	Crushed Stone for Macadam, Ballast and Concrete.	Miscellaneous.	Total.

(a) Includes all stone for building and road-making purposes.

(b) Included in flagging and curbing.

(c) Includes crushed stone.

The importance of Iowa as a stone producer lies in its limestone quarries. Some dolomite and sandstone are found, but these are gradually becoming of less importance to the industry. The production of sandstone has never exceeded the value of \$17,239.00 as reported in 1899, and the production the past year amounted to only \$8,575. The industry as a whole is not making rapid progress. The banner year, as shown by Table No. LIV was 1899, when \$809,924.00 was the reported value of the product. Since this period there has been about the same ratio of decline as there was of advance preceding it.

The popularity of imported lime and Portland cement, as also the increasing use of building brick, may be given as the causes of the present situation. The substitution of Portland cement for lime is shown by the decline in the value of stone used for that purpose. The value of stone for lime in 1904 was but \$91,003.00 as against \$230,188.00 in 1901. The value of stone used for building purposes in 1897 was \$376,409.00 and but \$162,577.00 in 1904. The sum for 1897 includes the value of stone used for road-making purposes, but the amount was too small to materially modify the figure.

The use of crushed limestone for concrete ballast and macadam is rapidly increasing. Prior to 1898 the amount was too small for itemized mention but rose until, in 1901, the value of the product for that purpose amounted to \$192,271.00. A slight decline has since occurred but the amount in 1904 was \$155,905.00 with a good prospect for a larger output in the future.

*Total .....	\$585,144.68	\$563,586	\$792,685	\$556,410	\$781,756	\$662,583	\$ 570,961	\$ 538,593

\*It will be noticed that the figures given in this table vary slightly from those in Table No. LIV. The custom of the Survey to revise its reports upon receipt of later information will probably account for the discrepancy.

Limestone, as shown by Table No. LV, has a very general distribution; the quarries throughout the state are usually small producers and the total for each county is usually the sum of a large number of items. The larger producers are in Jones, Jackson and Cerro Gordo counties, the value of their product ranging from \$82,341.00 in Jones to \$50,309.00 in Cerro Gordo. Madison, Scott, Dubuque, Lee and Wapello follow in order, the product of each exceeding \$30,000.00. All these counties are consistent producers. Cedar county, on the other hand, produced stone to the value of \$105,552.59 in 1897 and only \$15,824.00 in 1904. The figures for Marshall county for the same periods were \$59,467.50 in 1897 and no production for the years 1903 and 1904.

## GYPSUM.

Iowa holds third place in the rank of states as a producer of gypsum, Michigan and New York alone exceeding it in the amount produced. This entire output is obtained in Webster county, in which there are from sixty to seventy square miles underlain with the raw material. It is not probable, however, that over forty or fifty square miles of this area will be used for economic purposes. The remainder, due to the thinness of the deposit, will at least not be demanded for many years to come, as the supply in sight seems almost inexhaustable. The average thickness, suitable for plaster, is about ten feet, which will give a yield of over thirty thousand tons per acre.

The following table gives the amount and value of gypsum produced from 1890 to the present.

TABLE NO. LVI.  
*Amount and Value of Gypsum Produced.*

Year.	Amount (Short Tons).	Value.
*1890.....	20,900	\$ 47,350
*1891.....	31,385	58,095

(\*) Mineral Resources United States, 1903, pp 1,041-2.

(\*\*) Annual Reports of Iowa Geological Survey.

Figures in above table are not wholly reliable prior to 1903. Up to this date, officials of the companies steadfastly refused to give any information as to their business. The United States authorities were, therefore, obliged to base their estimates upon shipping reports furnished by transportation companies. The state authorities give no figures prior to 1899, but from that date it will be noted that a great increase in production apparently occurred. From subsequent investigation, those in charge of these estimates now believe that their report for that year was too high, while those of the United States prior to this were too low. The later reports supplied by the companies bear out this

information, as the business previous to 1903 is known to have greatly increased. Of this total production, fully eighty per cent is calcined into wall plaster, seventeen per cent represents the output of plaster of Paris, and the remainder, land plaster or crude gypsum.

### LEAD AND ZINC.

The lead and zinc mines of Iowa were opened by Dubuque in 1788 and operated by him until his death in 1810. From this date they were practically idle until 1833, when the "Black Hawk Purchase" was opened for settlement. Permits to miners were then issued by the Superintendent of Mines appointed by the Government, which saw fit at that time to levy a tax of six cents per point on all the lead produced at that point. The tax was extremely unpopular and was withdrawn in 1833. From then until 1849 the mines were very productive. The exact amount, however, cannot be given, as no record was kept. Mr. A. G. Leonard quotes an estimate made by Owen that the output in 1833 was over 3,000,000 pounds and states that, in 1854, 8,770,000 pounds were extracted. The latter estimate was based on the reports of shipments made by the transportation companies of Dubuque.

In speaking of the production of zinc, Mr. Leonard makes the following statement:

\* "It was not till 1860 that zinc came into the market and since then the production of this kindred metal has rapidly increased. During the ten years previous to 1882 the output of zinc more than doubled that of lead, while in 1889, according to the last federal census, the production was 13 to 1 for the entire region.

The principal ore of zinc now shipped from the Iowa mines is the carbonate or "dry bone" of the miners. Until some thirteen years ago this material was regarded as worthless and was thrown away on the dump piles, or the workings were abandoned when it appeared.

In the fall of 1880 two wagon loads were taken to Benton, Wisconsin, and sold for \$16 a ton. So far as known, this was the first zinc ore marketed from the mines of the state, and from this time on the carbonate has been removed in rapidly increasing amounts. The first mine to be worked for zinc was the McNulty (often called the Avenue Top) at the head of Julien Avenue, Dubuque. This had previously been operated

---

\*Iowa Geological Survey, Volume VI, page 18.

for lead and \$25,000 worth is said to have been taken from it. The galena gave out in the crevices and a short distance beyond the zinc carbonate began to appear. It is estimated that this mine has yielded not less than \$50,000 worth of zinc. After the sale of the first dry bone, many began at once to search for it, and numerous mines were soon being operated. Old lead diggings that had been abandoned when the associated metal began to appear, were again opened up and worked."

Of late years the production of both lead and zinc has declined. The report of 1904 shows that no zinc ore was mined the previous year and but 97,000 pounds of lead, valued at \$2,619, were produced. A temporary revival of the industry occurred in 1898 and would have continued throughout 1900 if legal difficulties of some of the principal producers had not retarded the work. The prime cause of the revival was the erection of a modern mill by the Dubuque Ore Concentrating Company, which furnished home market for the ore produced. The advantage gained, however, was not sufficient to overcome the sharp decline in the price of zinc witnessed in the last few years.

## IRON.

There is a small deposit of iron in Allamakee county, three miles northeast of the town of Waukon, which was exploited from 1899-1901. The deposit, however, is not of sufficient quantity, at present, to justify the erection of a smelting plant, and transportation facilities will not permit its transport to such a point at a profit. As a result, the industry has not flourished and in the last few years no amount worthy of report has been taken from the mines.

## BANKS.

The lead mines of Dubuque caused that city to become a commercial center early in the development of the western territory. This point formed a sort of entrepot into the state and clearing house for the business transacted between the east and the extreme west as it was then known. The business of the country had grown until banks were well understood east of the Mississippi, some seven hundred having been established prior to 1835. Under these conditions the application of certain cit-

izens of Dubuque for a bank charter for the "Miners' Bank of Dubuque" was in keeping with the commercial spirit of the period. The charter was granted by the Territorial Assembly of Wisconsin and, after receiving the sanction of Congress, began business October 31, 1837. The currency situation of the period, however, made its existence extremely unstable and subjected it to repeated investigating committees appointed by the Territorial Assemblies at the instigation of the opponents to banks. The opposition to all forms of banking, entertained by a large number in the new territory, apparently concentrated its energies upon this representative. Such determined opposition at this particular period was not without result and in 1851 trustees were appointed to settle up its affairs. The action was contested by the directors until the Supreme Court in 1848 sustained the constitutionality of the Act repealing its charter.

The enmity shown toward the Miners' Bank found expression in the constitution of 1846, by which banks were prohibited in the state. The natural development of the state, however, rendered banking facilities more and more a necessity, and in 1857 a new constitution was adopted. According to its provisions a state bank could be established upon specie basis and maintain branches mutually liable for each others' issues, or a general banking law could be passed. In either case the Act must be ratified by a vote of the people. The General Assembly that convened in 1858 not only established the state bank, but passed a General Banking Law, both of which were ratified by a succeeding vote.

The State Bank was at once established with offices in Iowa City. Several branches were shortly organized, among which may be mentioned the Farmers at Maquoketa and the Cedar Rapids branch at Cedar Rapids. These continued in operation until obliged to suspend as a result of the National Bank Act. There is no permanent record, however, to show that these banks were organized under the General Banking Law.

From this point, until after the panic of 1873 had spent its force, data relative to banks are extremely difficult to obtain. The revision of 1860 permitted corporations for pecuniary profit to file their articles with the County Recorder, but no notice was given to the Secretary of State. This was not changed until 1870, when all such corporations were required to file their articles with the Secretary of State within a period of three months. The Act does not seem to have been fully complied with, as sev-

eral institutions found difficulty in having a receiver appointed by state authorities, due to the fact that the Auditor refused to recognize any institution as a bank that had not complied with the law of 1870. For this reason the records are scattered and it is impossible at this time to assemble them. But taking such records as are held by the Secretary of State, it appears that five banks were incorporated in 1870, nine in 1871, ten in 1872 and twenty in 1873, making a total of forty-eight banks in existence prior to this date. It is believed that the majority of these were in existence when the Auditor made his report in 1873, but it will be seen by general tables, Nos. 51 and 52, for State and Savings Banks, but twenty-three reported, fifteen of which were Savings and eight State banks. By 1875 the law was better understood and the reports of nineteen Savings banks and twenty-three State banks probably show the relative condition of banks after the financial depression of 1873.

No record of private banks can be given until the year 1887. It is possible to select here and there statements of the number in existence but even the report of 1887 is subject to doubt, as these institutions are under no general supervision. Assembling the reports of those making statements to the Comptroller, it appears that the highest number reporting, 185, was in 1892, the increase having been gradual from 1887, since which time the number has shown considerable fluctuation but a general tendency to decline. The table is admittedly inadequate but may be considered representative of this class of banks.

The Comptroller of the Currency gives a table relative to the National banks which is reproduced in the general tables, No. 53. As early as 1863 there were three National banks in Iowa and by 1873 the number had increased to seventy-five, with total assets of over twenty-three millions of dollars. From 1874 to 1882 this class of banks made no progress, but from that date the advance has been rapid. The number gradually increased until the last report, when two hundred fifty-three banks were in existence with assets of one hundred eighteen millions of dollars.

The tables for State and Savings banks show periods of prosperity similar to those experienced by the National banks. The parallel between the State and National banks is particularly striking. The Savings banks, on the other hand, have outstripped both in number and assets.

\* The statistics relating to national and private banks are taken from the reports of the Comptroller of the Currency. Only a small portion of the private banks of the state are reported. No complete statistics as to private banks are available. This note applies also to Table No. 50, pages 774 and 775, where the note was omitted by oversight.

# CHART SHOWING CONDITION OF BANKS IN IOWA 1873-1905

..... SAVINGS BANKS.  
 - - - STATE BANKS.  
 - - - NATIONAL BANKS  
 - - - PRIVATE BANKS  
 ——— TOTAL.  
 DEPOSITS, PRINTED RED.  
 CAPITAL STOCK, PRINTED BLUE.

MILLIONS OF DOLLARS

The capital stock of the banks of Iowa as reported in 1873 was \$6,827,956. Thirty years later it was \$40,874,588, a sum that marks the highest point in the constant and almost uniform increase during the period. The showing made by the amount due depositors is in sharp contrast. In 1873 this sum amounted to \$11,935,411, not including the amount in private banks, a statement for which cannot be obtained. At the end of the period the deposits as shown by the table, including the private banks, amounted to \$211,088,915, or, without the private banks, \$196,779,980.

Prior to 1889 the increase in deposits was but a little more rapid than the increase in capital stock, but from this date, with capital stock almost stationary, the deposits mount upward, reach the \$72,000,000 mark in 1891, make little progress until 1897 and then suddenly advance for the next six years. The movement is in great part indicative of the prosperous condition of the state, but to accept the amount of deposits as a measure of prosperity of the banking business would be erroneous. Deposits represent not only the increase in material wealth, but the better knowledge of the banking business and its extension to the smaller money transactions. Another important factor is the custom of banks to deposit a large per cent of their surplus in other banks. This produces a duplication of deposits that, unless understood, would result in wrong judgment.

The chart showing the amount due depositors and the capital stock of banks gives graphically the relative standing of the several classes of banks. The National banks rank first in amount of capital stock, but second in amount due depositors. The Savings banks have so increased their capital stock since 1899 that it now exceeds that of the State banks, while the amount due depositors has exceeded the State or National banks since 1893, and in the past five years has advanced more rapidly than either.

The diagram further shows the effect of the depression of 1893. From 1891 to 1893 there was a sharp decline in the deposits in National banks. The State banks increased slightly, but the Savings banks continued to increase until 1893, when the deposits in all banks were retarded until 1897.

## FIRE INSURANCE.

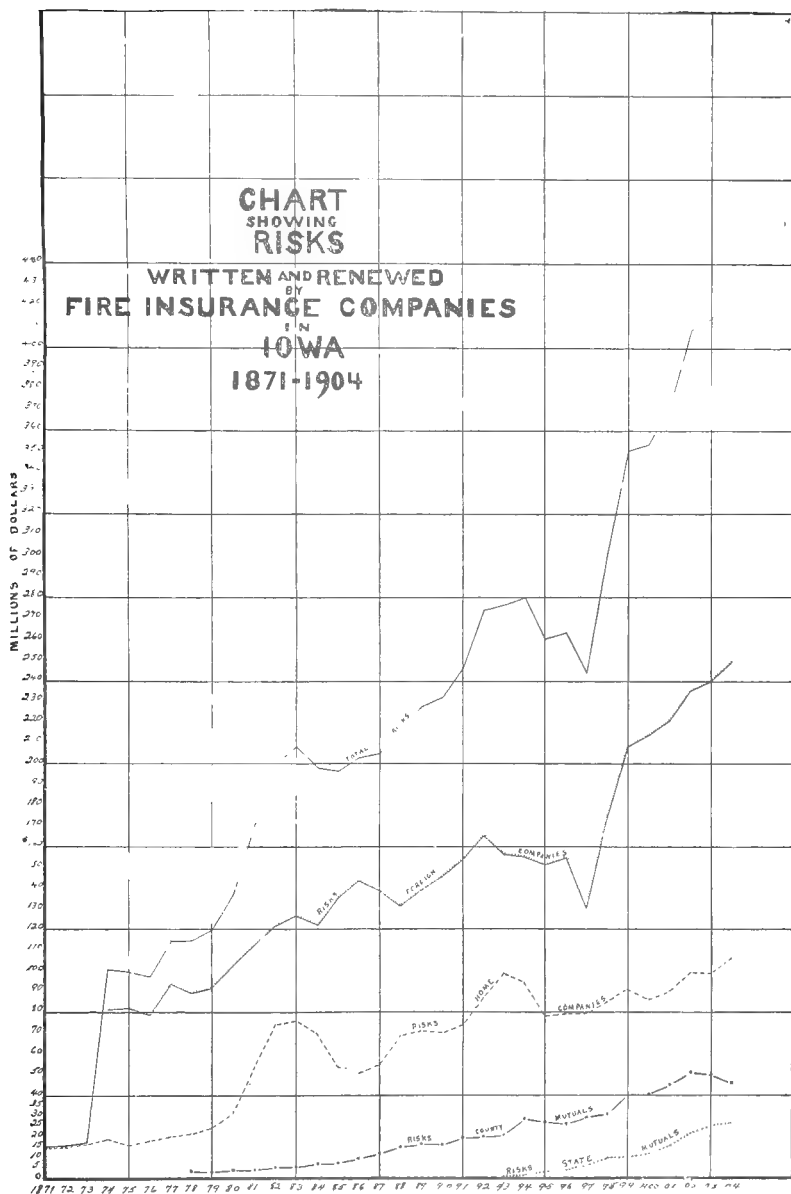

The first step toward securing a public report of the business and financial condition of the insurance companies of the state

was taken in 1857. Companies incorporated under the state law were required to file statements with the clerk of the district court of the county in which the company was located, giving minute information as to its financial status. It was further directed that a semi-annual statement of the business done by each company should be filed with the Auditor of State, who at this time became the custodian of the guarantee funds of the companies. Prior to this the insurance companies had been subject to the general laws governing corporations, with special laws for taxation. These special laws exempted the Mutuals from assessment but taxed all others 2 per cent of the premiums received in the county, this sum being equally divided between the county and the state.

The general insurance law of 1868 specified that the Auditor should present in tabular form the several reports received by him, but it was not until 1870 that the reports were actually published and, even at that date, they were admittedly inadequate.

Based upon these reports, general table No. 54, p.782, has been compiled, which shows the risks written or renewed by fire insurance companies from the year 1871 to the present, from which data the chart, see opposite page, has been constructed, showing the comparative advance of the several classes of companies within this period.

This small amount of risks written in 1871 is not due alone to inadequate reports, but to several other causes. Of the forty companies incorporated under the laws of the state, and doing business prior to the enactment of the law of 1868, but fifteen were reorganized. Of these, nine continued until 1878, when the number was reduced to eight. In the following year another company retired, and in 1876-7 but six remained: the Iowa State (Mutual) of Keokuk, the Farmers of Cedar Rapids, The Hawkeye and State Insurance Companies of Des Moines, the German Mutual of Davenport, and the Burlington Insurance Company of Burlington. Concerning these, it may be remarked that only the first four are now doing business in the state. The year 1871 was particularly disastrous to foreign companies, due to the Chicago fire, which impaired their capital to such an extent that the Auditor, after careful examination, ordered thirty-two of the seventy to discontinue business in the state, and announced in his report that the capital of fifteen of the remaining thirty-eight was impaired, but that they would be permitted to con-

tinue business for the present. The law of 1868 made it legal for Mutual companies to organize if they had two hundred applicants for insurance, the premiums upon which would aggregate \$25,000, but such companies were not required to report to the Auditor until 1878. Finally, this was the period of depression, which very naturally influenced the amount of insurance written.

In spite of these drawbacks, over \$100,000,000 fire insurance risks were written or renewed in 1874, which mark, due to the money stringency of the period, was not again reached until 1877. After this date, the Mutuals aid in increasing the sum total, which reaches the \$200,000,000 mark in 1882, exceeds \$300,000,000 in 1898, and at the last report, 1904, amounted to \$429,852,006.

The period 1879 to 1883 was one of conflict, in which premiums were reduced in order to obtain business, and the complaint was frequently heard that rates were being recklessly cut. In this fight it will be seen from the chart that the business of the home companies advanced more rapidly than that of the foreign, although the amount written was considerably less.

Comparatively speaking, the Mutuals at this date did not appear an important factor in the insurance business, yet in 1880 they carried over \$16,000,000 of risks, and in 1883 this sum advanced to \$23,000,000.

Beginning with 1883 a marked decline occurred which affected all companies except the Mutuals, but was the most marked for the home companies, which decline continued until 1887; the foreign companies, however, increased after 1884. During this period considerable "Wild Cat" insurance was carried on, and at least one company was obliged to suspend business on this account.

From this date until 1893 a moderate advance was made, but the financial condition of that period resulted in a decline, which was not overcome until 1897, from which time the foreign companies have advanced very rapidly, and the home companies have with difficulty held their own. It is probable the progress of the latter has been checked by the more recent rapid growth of the county and state Mutuals, who have in the past decade trebled the amount of risks written.

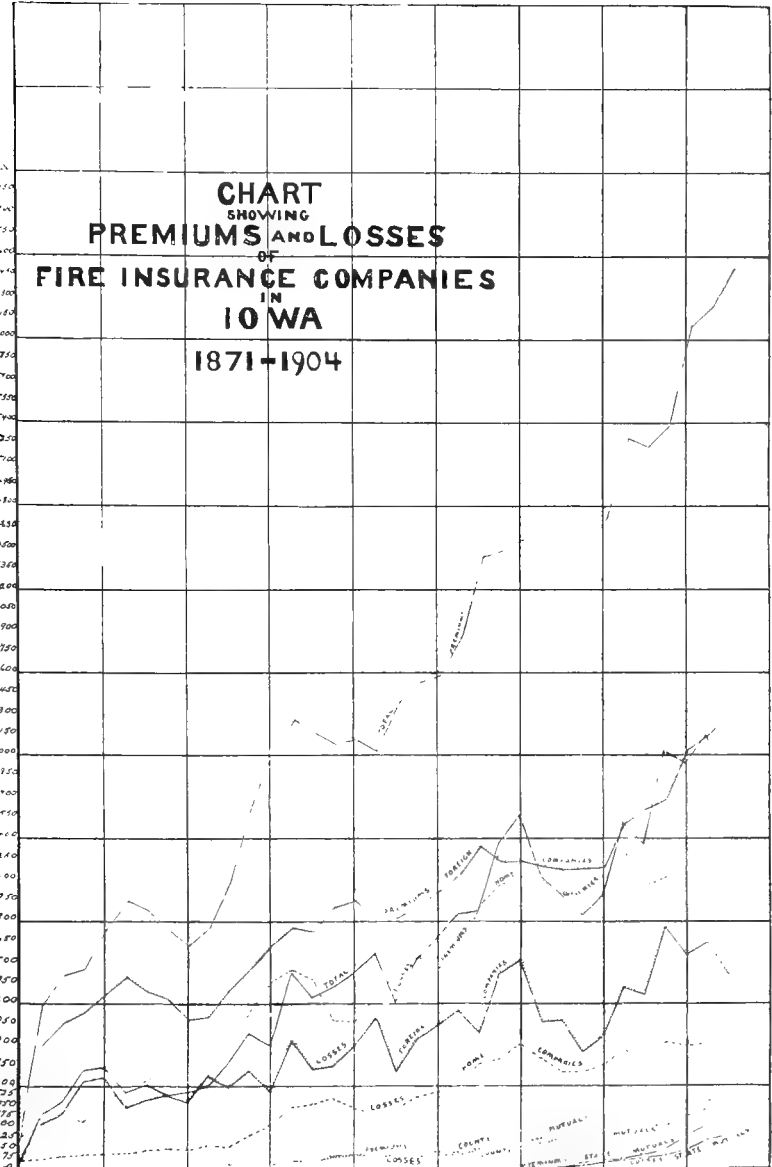

The other lines of insurance were legalized by the act of 1868, but it was not until 1881 that the Fidelity and Casualty Company

CHART  
SHOWING  
PREMIUMS AND LOSSES

THOUSANDS OF DOLLARS

1870 71 72 73 74 75 76 77 78 79 80 81 82 83 84 85 86 87 88 89 90 91 92 93 94 95 96 97 98 99 00 01 02 03 04

of New York state made a report to the Auditor; it was 1890 and 1893, respectively, before the Tornado and Hail Mutuals came into existence.

For the first few years, the Casualty companies did a small amount of business, but by 1891 risks to the amount of \$10,000,000 were written. The year 1895 was a very prosperous one for the companies, but in per cent of advance or amount written did not equal 1898, in which over \$22,000,000 of risks were written. From this date the advance has been in keeping with the increased necessity for such insurance, and the last report shows that a sum total of \$63,433,218 of risks has been written in a single year.

The Tornado Mutual passed the \$10,000,000 mark in 1895, wrote over \$28,000,000 in 1899 and in the year 1904, \$25,692,449 of risks.

The Hail Mutual has not been so successful and the risks written are far more variable than the other class. Beginning with the sum of \$1,360,725 of risks written in 1893, the amount rose to \$4,790,190 in 1896, which was the high water mark for the business. Since this date it has declined as low as \$1,082,622 in 1898 and in 1894 wrote \$3,203,608.

The total amount of premiums paid to the insurance companies other than life, in the year 1904, as shown in general table No. 55, was \$7,198,051.38, of which amount \$6,566,514.44 or 91.2 per cent was paid for insurance against fire. The amount of losses sustained by the companies for the year, general table No. 56, was \$3,064,175.21, of which 92.8 per cent or \$2,845,567.25 was paid for fire losses. The sum remaining to pay expenses and reimburse the stockholders of the companies was \$4,133,876.09 or 57.4 per cent of all the premiums received.

In order to show the relative premiums and losses of the several classes of companies, Table No. LVIII has been computed, and the chart showing premiums and losses constructed. It will be seen from these that the regular Iowa companies paid out in losses, for the year 1904, 36.1 per cent of their premiums; that the foreign returned 42.4 per cent; the state mutuals 53.5 per cent and the county mutuals 73.2 per cent.

TABLE NO. LVIII.

### LIFE INSURANCE.

The life insurance companies of Iowa did not organize at an early date. Prior to 1874 only one company, the Equitable Life, had been organized under the state law, but in that year the Iowa Life of Keokuk was incorporated. About the same time, under the authorization of section 1160 code of 1873, which gave special privileges to mutual companies, a number of this class were established. No statement of their success, however, can be made as they were not at first required to report to the State Auditor as were the other companies. That they enjoyed a considerable degree of success is witnessed by a remark of the Auditor in his report of 1876 to the effect that the decrease in the business of the regular life companies was due "to the money stringency and the rapid spread of private associations and societies." Their presence, it appears, and the disastrous years of 1877 and 1883 hindered the formation of Iowa companies, so that in 1881 but four reported to the Auditor. Two of these were situated at Burlington, one at Des Moines and one at Keokuk. The latter company, however, was closing its business and had already signified its intention of withdrawing. The same number remains in 1893, but aside from the Equitable of Des Moines, three new ones have taken the place of the Burlington and Keokuk companies. They were the Life Indemnity and Investment Company of Sioux City, the Register Life and Annuity of Davenport and the Royal Union Mutual of Des Moines. Since that date other companies have been organized and, according to the

CHART  
SHOWING  
PREMIUMS AND LOSSES  
OF  
LIFE INSURANCE COMPANIES  
IN  
IOWA  
1870-1904

THOUSANDS OF DOLLARS

last report of the Auditor, the following seven companies were doing business in the state: American Life, Des Moines; Central Life Assurance Society of the United States, Des Moines; Equitable Life Insurance Company of Iowa, Des Moines; Guarantee Mutual Life Insurance Company, Davenport; Register Life and Annuity, Davenport, and the Royal Union Mutual of Des Moines.

The absence of Iowa companies did not leave the state without representatives of the business. As early as 1872, 47 foreign life companies reported and the Auditor estimated that there were at least 40,000 policy holders in the state. The necessity for this estimate was the lax enforcement of the law requiring that reports of all companies be filed with the Auditor. This was remedied and by 1875 the foreign companies reported policies to the amount of \$32,657,742.30 in force, which, together with the \$1,996,720 held in home companies, made a grand total of \$34,654,462.30. General table, number 57, page 786, further shows that the total premiums for that year amounted to \$944,686.84 and that to the extent of \$334,982.90 were sustained. The years immediately following, as indicated by the chart showing premiums and losses of life insurance companies, were disastrous for the business and it was not until 1885 and 1886 that the amount of insurance in force again equaled that of the years before mentioned. The losses during this period, however, remained about the same. The lesson taught the companies in this season of investigation and exposure seemed to fit them for better efforts in the future and their progress since that date has been rapid. Only during the depression of 1893 is their advance retarded. In 1895, \$90,681,247 in policies were outstanding January 1st. Two years later over \$101,000,000 was outstanding and by 1904 this amount had almost doubled and reached the enormous sum of \$200,347,229. In the same period the premium rose to \$7,116,977.36 and losses, while not increasing in the same proportion, amounted to \$1,887,388.47.

The home companies have not succeeded in making material gains upon their competitors. The line of the chart showing their premiums indicates that until 1895 they made little if any progress. From that date a decided advance occurred until 1902, after which their business has materially declined.

#### **COUNTY RECEIPTS AND EXPENDITURES.**

The many requests for reliable information as to county finances led the Executive Council to request the auditors and

treasurers to fill out certain schedules showing the receipts and expenditures of their respective counties. The response was gratifying and, with few exceptions, carefully compiled replies were received. The greatest difficulty arose from the lack of uniformity in the books of the various county officers. This not only rendered correct replies to the schedule frequently difficult to make, but often almost impossible. After lengthy correspondence, however, and frequent revisions it is believed that both items and tables may be compared and correct conclusions derived therefrom.

## COUNTY RECEIPTS FROM ALL SOURCES.

### TABLE NO. LIX.

*County receipts from all sources, 1904.*

	Amount.	Per cent.
Tax collected .....	\$26,166,464.99	88.81
Penalty collected on tax .....	162,686.72	.55
Interest on permanent school fund .....	239,216.90	.81
Costs collected .....	16,606.69	.29
Fines and forfeitures .....	88,082.85	.05
Fees of officers .....	504,988.37	1.72

Receipts from sale of produce and stock of poor farm .....	99,840.32	.34
Receipts from care of inmates of poor farm .....	15,786.59	.05
Teachers' Institute .....	55,984.71	.19
Other sources .....	1,029,922.05	3.50
<b>Total</b> .....	<b>\$29,466,005.89</b>	<b>100.00</b>

The total amount received by the county authorities for the fiscal year ending December 31, 1904, was \$29,466,005.89. The principal item in this sum is taxes collected, which amounted to \$26,166,464.99 or 88.81 per cent of the entire amount received. The item next in importance was the mulct tax, which produced during the year in question \$1,086,965.70 or 3.69 per cent of the total receipts of the counties. The other items as compared with these two are of minor importance if the sum produced is alone considered. They are frequently, however, of greater import than their sum total signifies. The penalty collected on delinquent taxes amounted to \$162,686.72. The amounts so collected by the respective counties under this heading, as shown in general table No. 58, page 788, present no striking features. Polk and Linn naturally show a larger amount than counties of less wealth. But on the whole it appears that something less than \$2,000.00 is usually collected by the counties due to this delinquency.

The interest on the permanent school fund represents the amount received by the counties as interest upon that portion of the school fund for which they are responsible. This item

should not be confused with the apportionment fund, as it frequently occurs that the county collects a large amount of interest upon this fund above the amount that should rightfully be apportioned to it. This excess is naturally turned over to the state, and the counties having a smaller amount of the fund, or none at all, as in Clinton and Linn counties, receive their fund apportioned in the usual way. The sum of \$16,606.69 appears to be a very small amount for the item of costs collected. It seems doubly insignificant when viewed in connection with court expense, which was \$717,513.87 for the same period.

A number of counties, Bremer, Cherokee, Clayton, Clinton, Delaware, Franklin, Lee, Van Buren and Wapello, report that no costs whatever were collected, while the highest amount returned is shown to be obtained by Marshall county and is \$1,790.23. Before accepting these figures, a large number of inquiries were sent out asking definitely as to the correctness of this item, and the results appearing are only given after careful study of the replies made by the county officials. There is a probability that the \$86,062.85 appearing under the head of "Fines and Forfeitures Collected" may include some of these items, and it will be noted that those counties reporting no costs frequently return a comparatively large sum under this item.

The fees of various officers present a total of \$506,988.37 and represent amount collected by the county officers as fees for their services. The original reports of many of the county officials gave, in this sum, only the amount above their salaries, but where this could be determined by correspondence or the printed reports of the counties, the item has been made to cover the entire fees, irrespective of whether the county permitted the officer to retain a portion thereof as his salary or not.

The amounts, therefore, appearing are believed to be a fairly accurate statement of the total amount obtained from this source. The county showing the largest return under this head, as might be expected, is Polk county with \$32,170.90 returned as fees of its officials. Linn is entitled to second rank with \$26,118.82, and Ida lowest with \$1,691.70.

An item frequently overlooked yet of prime importance in the study of the charity problem in the state is the amount received from sales of produce and stock of the poor farm. The amount returned is not large, \$99,340.32, but it represents a material credit to the expenditure usually considered to be without profit. This amount is returned by 79 counties of the state and is made

up of items that vary in amount from \$4,412.21 in Dallas county, \$8,701.74 in Polk, \$3,348.52 in Franklin, to very insignificant amounts in several counties. Another return in the expenditure for the poor, to the fund of the counties, is represented by the amount received from relatives for the care of inmates at the poor farm. This in the year in question amounted to \$15,786.57, making the sum total returned to the counties for expenditure upon the poor, \$115,126.91. The amount paid by relatives for the care of inmates does not appear to vary directly with the size of the county. Frequently the smaller counties show a larger return than the larger counties, which leads to the belief that the amount received under this heading is due very largely to the efforts of the administrative officers.

Under the head of "Other Sources," which produced the sum total of \$1,029,922.05, have been included all items not properly enumerated under the headings mentioned elsewhere in the table. The sale of old bridge timbers, the amount paid for the care of patients at certain state institutions, sale of laws, special paving and sewer taxes, amounts returned by tax ferrets, and like items have been grouped in this list.

## DISBURSEMENTS.

Township Funds .....	11,638,954.57	40.4
Corporation Funds .....	5,106,180.93	17.9
Total .....	\$28,804,181.55	100.0

The above consolidated statement of the expenditure of all the counties is obtained from general table No. 59, page 792, which gives each of the above funds by counties and represents the total amount expended by a county for all purposes. The township fund due to the expenditure for the public schools of the state reaches the largest amount, \$11,638,954.57 or 40.4 per cent of all the county expenditures. The county fund is next in order, including in it all the items of the preceding table and amounting to \$9,703,512.01 or 33.7 per cent, the state fund constituting but 8 per cent of the entire amount and the corporation reaching 17.9 per cent.

## COUNTY EXPENDITURE.

TABLE LXI.

*County expenditure for purely county purposes, 1905.*

	Amount.	Per cent.
County fund .....	\$ 3,658,582.97	37.70
Court expense .....	717,513.87	7.89
County road .....	648,001.14	6.68
County bridge.....	1,882,869.62	19.41
Apportionment fund.....	904,674.76	9.32
County institution.....	54,465.78	.56
Insane fund.....	651,592.13	6.71
Pauper fund .....	960,275.18	9.90
Soldiers' relief fund.....	149,291.86	1.54
Feeble minded.....	16,842.92	.17
Inebriates .....	5,326.26	.06
Quarantine expense.....	42,125.47	.48
Bounty on wild animals.....	12,450.60	.18
Total .....	\$ 9,708,512.01	100.00

The outlay of the various counties is itemized in general table No. 60, page 794. The itemized statement given above represents the totals appearing upon that table. It should be borne in mind that this itemized statement is expenditure for county purposes and does not, therefore, correspond with the preceding table. The fund that it attempts to itemize is usually known as the General County Fund. Considerable difficulty has been experienced in obtaining the classification here given, as the books of the county officials were frequently worked out upon a different plan. The largest individual item is what is known as the County Fund and constitutes the amount of money spent by the county for administration purposes and such necessary items as are not given in the table. The sum of \$3,658,582.97 constituted 37.70 per cent of the total expenditure and was almost twice the amount of any other sum reported; the County Bridge, showing \$1,882,869.62 disposed of for the purpose of caring for the old and building new bridges in the county, represented but 19.41 per cent of the total. The fund next in order of importance was the pauper fund, against which appeared a debt of \$960,275.18, which is 9.91 per cent of the funds expended by the county.

The fund as here given represents the amount spent, usually at the county farm, for the care of the county poor and insane. In the past fiscal year Dubuque expended \$42,119.35 out of this fund, the largest amount of any county in the state, and reports having received \$775.79 from sale of produce from the

poor farm, and nothing is reported as received from relatives of inmates, leaving a net expenditure of \$41,343.56.

~~Now~~ It should perhaps be stated that the apportionment fund includes the one mill levy, the fines and interest upon the permanent school fund and is the amount given by the county for school purposes. In the case of the pauper fund expenditure for feeble minded and inebriates, it sometimes happens that distinction cannot be made, but it was deemed advisable to separate these where possible and, as a result, the several headings in the table are given. The fact, however, that no amount appears in a given county under one of these items is not necessarily indicative that no expenditure has been made.

### CITIES AND TOWNS.

General tables Nos. 61, 62 and 63 give data for the cities and towns of the state. The material for these was obtained by sending schedules to the mayors of all the cities and towns. The replies received represented considerable care and investigation and in the majority of cases were satisfactory. So far as possible the answers given have been tabulated in the language of the reports, as the task of unifying the entire was beyond the resources of the bureau. Municipal enterprises appear to be based largely on the issue of city bonds; more particularly is this true of the water works than of the gas or electric light plants. The number of parks reported is not in keeping with the needs of the urban population of the state; the same may be said of the library facilities, although it appears that this line of effort is receiving greater attention than formerly.

A series of very unsatisfactory replies was given to the question of the amount and character of the indebtedness and the assessed value of the town or city property. It is evident that some of the answers given refer to the actual value instead of the assessed. Inasmuch as the bureau had no means of verifying or correcting these, they are published just as given on the returned schedules.

### INSTITUTIONAL EXPENDITURE.

The expenditure of the several institutions under the management of the Board of Control of state institutions is given in general tables Nos. 64-76 inclusive. These expenditures are divided, where possible, so as to show the amounts spent for support, salaries, and as special funds. The general summary appears in Table No. LXII, in which the entire expenditure for each biennial period is given.

The increased amount expended in the better care of the delinquent and defective classes is a tribute to the higher culture of the state and represents the most advanced thought in the line of care for the unfortunate classes. In 1859 but \$68,-478.75 is reported, 1883 shows over \$1,000,000, and the biennial period just closed reports a total outlay of \$3,426,549.05.

## INCOME OF EDUCATIONAL INSTITUTIONS.

At the request of the Census Bureau, each of the educational institutions submitted an itemized statement of its income annually, or by biennial periods, since its organization. In their early activity accounts were not kept as at present, hence some difficulty was experienced in making the classification and, in some cases, it was impossible to obtain even the total sum received. From about 1865, however, the statements are complete and represent careful effort on the part of authorities of the institutions. It will be noted that until a comparatively recent date the increase has been slight from year to year, but within the last few years larger sums have been placed at their disposal.

## HOMES—FREE AND INCUMBERED.

Over one-third of the homes of Iowa are incumbered, as reported to this bureau by the assessors of the state. Returns were made for 301,762 homes but the value was not given for 973 of this number and they were therefore not included in the calculation. A total of 105,503 incumbered homes were returned. This is 35.1 per cent of those for which the value was given. The amount of incumbrance does not form so large a per cent of the value. Upon the total value of \$1,449,456,274 an incumbrance of \$219,780,612.00 rests, or 15.2 per cent of the amount is covered by incumbrance.

Considered by age classes the greatest number of incumbered homes are held by those 21 years of age and under 45, the proportion incumbered and the amount of incumbrance being twice that of the higher age group.

TABLE NO. LXVII.

*Number and value of homes free and incumbered, and amount of incumbrance, according to age classes of occupants.*

	Under 21 Yrs of Age.	21 and Under 45 Yrs of Age	45 Yrs of Age and Over.	Total.
Number of homes value reported....	282	112,768	187,739	800,789
Number of homes reported incumbered.....	71	54,043	51,359	105,508
Per cent of homes incumbered.....	25.2	47.9	27.4	35.1
Value of homes reported.....	\$ 814,109	\$ 526,096,964	\$ 922,545,201	\$1,449,456,274

Per cent of incumbrance to value...	13.5	22.8	10.8	15.2
Free homes value not reported.....				973
Total homes reported.....				301,762

TABLE NO. LXVIII.

*Counties having the greatest proportion of incumbered homes, 1905.*

	Per cent of Number.	Per cent of Incum- brance to Value.
Cerro Gordo.....	71.6	17.2
Winnebago.....	60.6	27.2
Audubon.....	58.8	22.8
Emmet.....	57.1	25.0
Hancock.....	58.1	27.6
Ringgold.....	54.7	24.7
Dickinson.....	53.9	24.2
Osceola.....	53.4	12.3
Lyon.....	51.5	23.2
Pocahontas.....	50.7	18.8

The ten counties having the greatest proportion of homes incumbered, arranged in order, are given above. Cerro Gordo, which stands first in proportion of homes incumbered, ranks below many others in the per cent of incumbrance to value. Muscatine, as shown in general table No. 77, p. 840, is a good illustration. Its proportion of incumbered homes is the lowest of the counties but the incumbrance is 16.7 per cent of the value, while in Cerro Gordo the incumbrance is 17.2 per cent. Mills and Winneshiek again rank lowest, if per cent of incumbrance to value is taken, having only 10.2 of the value of its homes incumbered, yet 32.1 and 30.6 per cent, respectively, of the total number are subject to debts.

In the fall of 1852 surveys were made for what was later known as the Mississippi and Missouri Railroad. The line was to operate between Davenport and Council Bluffs. By 1856, as shown by the map showing the growth of the railway system of Iowa, the line was completed to Iowa City and, shortly, extended southward from Davenport to Muscatine. At this date, in order to hasten the construction of this and other lines, a grant of alternate sections of land for six miles on either side of the track was made. The lines designated for this donation, besides the Mississippi and Missouri River road, were a line from Burlington to the Missouri river and one from Lyons city, Clinton county, northwest to Maquoketa and thence across the state.

Reference to Table No. LXIX will show that the land grants were not very successful in pushing the roads westward. By 1861 but 331 miles of road had been built. The four trunk lines which were later to span the state had, however, been laid out and were already reaching westward. The Dubuque and Sioux City Railroad had reached Cedar Falls in Black Hawk county; the Chicago, Iowa and Nebraska, now the Chicago Northwestern, was building in Tama county; the Mississippi and Missouri River road had halted at Iowa city; the Burlington and Missouri had reached the county seat of Wapello, and the Des Moines Valley extended from Keokuk into the same county.

With 1862 the building era of Iowa roads begins. Rumors of a road to the Pacific had spread and each line was anxious to reach the Missouri first and form a junction with the westerly

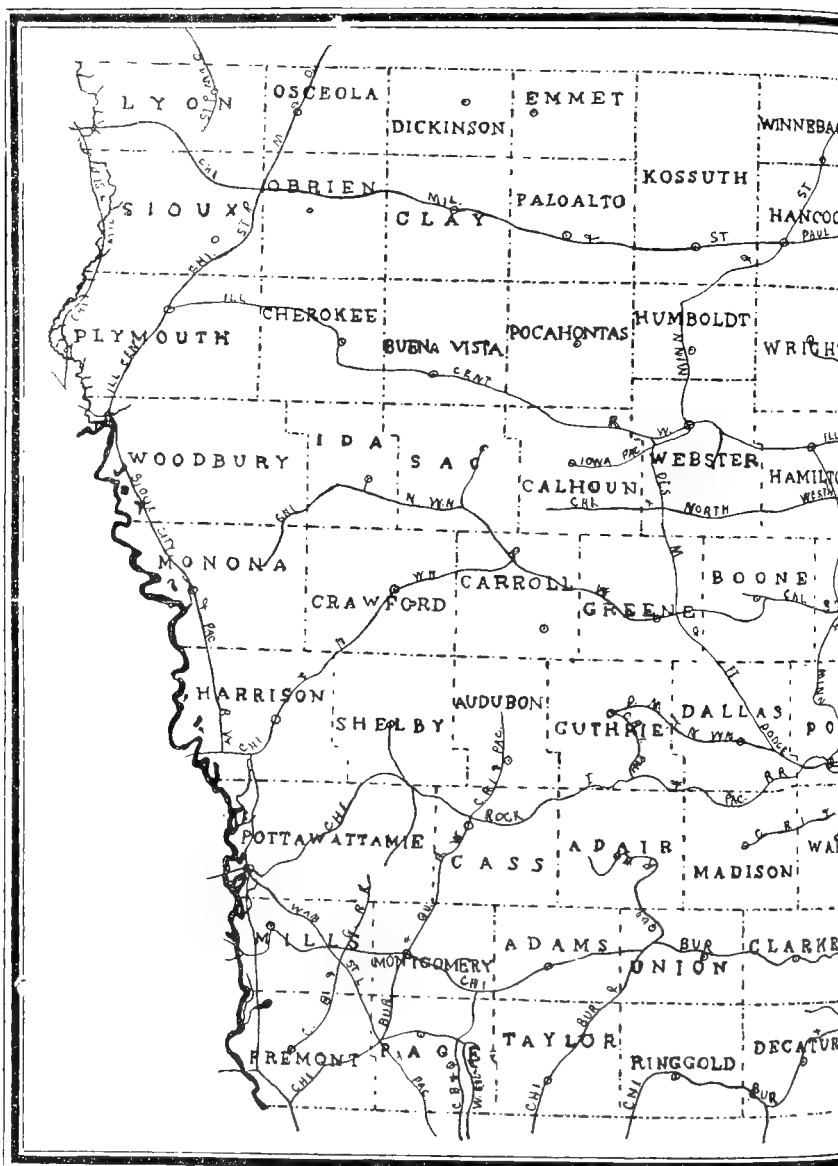

road. The Mississippi and Missouri extended its line to Grinnell; the Cedar Rapids and Missouri River to State Center, and the Des Moines Valley pushed northward to Mahaska county.

The period 1864-1866 witnessed the extension of the Cedar Rapids and Missouri half way across the state and saw it bend southward almost through Harrison county to reach Council Bluffs, the expected Pacific terminal. The Mississippi and Missouri River road built a short extension to Newton, but owing to financial difficulties was taken over by the Chicago, Rock Island and Pacific, which hurried its completion and by 1869 was ready to operate trains across the state. The same year the Burlington and Missouri River reached the Missouri river. The Cedar Rapids and Missouri River, however, had preceded them by almost two years.

At the close of the period 1870, the four trunk lines across the state were complete and the McGregor and Western, now the Chicago, Milwaukee and St. Paul, had reached Algona. The work of the following decade was to complete this system and, by running roads north and south, make possible the development of the territory between the east and west lines. The extent to which this was accomplished is indicated by the map showing the railway system of Iowa in 1880. At least three lines from the northern to the southern boundaries of the state may be distinguished: the Burlington, Cedar Rapids and Northern with its southern connections; the Iowa Central; and a third, made up of the Des Moines Valley, the Des Moines and Minnesota and the Minnesota and St. Louis. The Chicago, Milwaukee and St. Paul was in the northeast and numerous other lines in the south. The northwestern portion of the state, however, remained undeveloped and but one-half of the present mileage had been constructed.

The period 1890 to 1904 is one of great development. The mileage of the state doubles; interior commercial centers, as Des Moines, Cedar Rapids, Oskaloosa, Fort Dodge and Waterloo, become more prominent, and branch roads in all directions make the transportation system of the state one of the best.

\* This table shows the aggregate assessed value, the average assessed value per mile of the railroad property of this state, as fixed by the Executive Council on the first Monday in March or the first Monday in July of the respective years, as indicated in the left hand column. The items "miles of road" and "gross earnings," shown in connection with each year's assessment, are for the year ending on the 31st day of December last preceding. The following column shows what percentage the aggregate assessed value is of the aggregate gross earnings for the preceding calendar year, likewise of net earnings.

† This amount is based on the average number of miles of road operated within this state for the entire year ending December 31st of the year preceding. The taxes paid are always paid on the mileage reported two years prior to the date the taxes are required to be paid to the Executive Council, e. g. the tax reported in 1905 was levied on 9,726 miles of road, that being the mileage reported and assessed in 1903, and the taxes were paid in 1904. Hence, in determining the amount of taxes paid per mile, it is necessary to use the mileage reported two years prior to the year in which the taxes were reported to the Executive Council. In determining the per cent of tax on gross and net earnings, it is necessary to take earnings of preceding year.

The preceding table, compiled by the Secretary of the Executive Council, summarizes general tables Nos. 78-80 inclusive. From 1880 to 1905 the total assessed value of the railroads of Iowa has more than doubled and the assessed value per mile risen from \$4,997.00 to \$5,937.00. The lowest valuations for the period were for the years 1883 and 1890, the figures being \$4,171.00 and \$4,189.00 respectively. Upon this estimated value, taxes have more than trebled in the amount paid annually and increased from \$129.00 per mile to \$220.00.

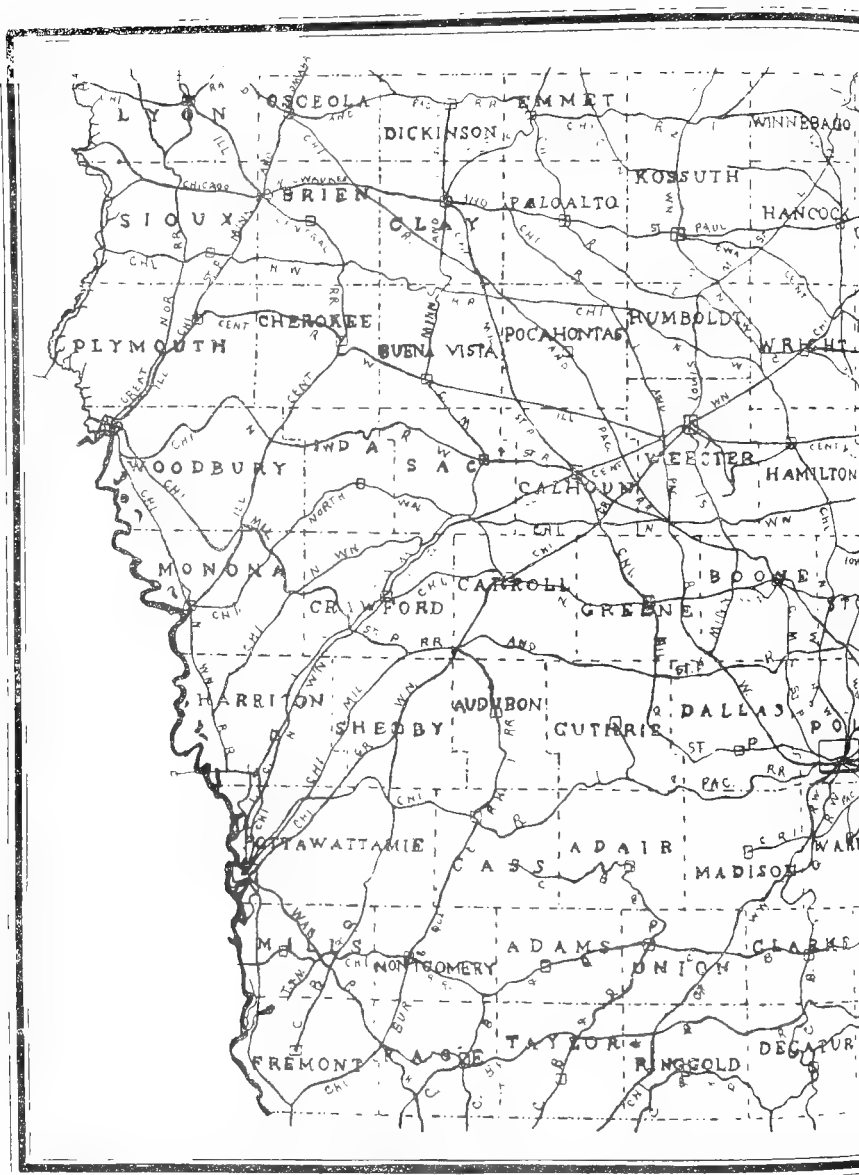

### CHURCHES.

Extreme difficulty was experienced in obtaining the following data. The schedules submitted the assessors were so heavy it was deemed inadvisable to ask these gentlemen to furnish further information. Moreover, it was thought that data fully as reliable could be obtained direct from the pastors of the several churches. To this end, return postals were mailed requesting replies to the inquiries here tabulated, but for some reason a comparatively small number were returned. A second, and a third more urgent, request resulted in more comprehensive reports. It was thought to supplement these replies from the printed reports of the various denominations, but it soon appeared that they were frequently defective at the same point as our returns, and in no case had the information been obtained for the current year. This source was, therefore, discarded and the following tables are based on the returns made direct to the census bureau. The extent of the discrepancy is difficult to estimate. No particular denomination can be selected as subject to a less variation than others. After a careful calculation it appears that replies were obtained on an average from about 91 per cent of the congregations of the state. To secure, therefore, the correct number, any one desiring to make an estimate will be within bounds if 9 or 10 per cent be added to the figures given in these tables.

The instructions given the pastors for filling the schedules directed that churches should embrace all buildings owned and used for worship, but that in returning the values care should be taken to include only property owned by them. For this reason rented structures used for church purposes are not included in the values given. They were further directed not to include the value of the school property belonging to the church. In returning the number of members or communicants they were

MAP SHOWING  
RAILWAY SYSTEM  
OF  
IOWA  
1904

requested to limit their statement to the number privileged to participate in the ordinance of communion, if the denomination observed this ordinance; otherwise, all members of the church should be returned.

A total of 3,821 congregations reported. Of this number, 3,610 worshiped in churches, 60 in halls and 151 in other places. The seating capacity was reported as sufficient to accommodate 1,155,648 persons, and the number of church members as 581,840. The total estimated value of the places of worship owned by congregations was \$20,918,960.00. The 1,966 parsonages, valued at \$3,903,639.00, raised the total value of the church property in the state, used exclusively for church purposes, to \$24,822,599.00.

TABLE NO. LXXI.

*Number of Congregations, number, character and value of the Places of Worship, number of Members and Sunday school scholars, by counties.*

## ERRATA.

---

Page 727 Total bushels corn should read 346,577,988,

Pages 612 to 664—Military service returns not complete for Linn, Keokuk and Story Counties.

Page 774—Table No. 50, Private Banks, should have been followed with a note stating that the table contained data for only such banks as have reported to the Comptroller of the Currency; not to exceed one-fourth of the banks reported.

Cass County—All population figures affecting the city of Atlantic should be examined in connection with the revised figures, as the same appear in tables No. 1 and 2, and figures affecting Cass county should be examined in connection with the revised figures in table No. 7. All tables in the introduction have been corrected in accordance with these revised tables.

Page 498—Total white population for state, 2,195,219.
